What is this product?

Type

The product is a UCITS - Part 1 sub-fund of a SICAV under Luxembourg law.

Term

This product is an open-ended fund without predefined maturity. You may request the redemption of shares generally on each valuation date. The company may, however, suspend the redemption if extraordinary circumstances appear to make this necessary, taking into account the interests of the investors. Further, the company may restrict the redemption. The product may be redeemed early in certain circumstances as set out in the sales prospectus. The SIC share class of DWS Concept Platow was launched in 2018.

Objectives

The fund is actively managed. The fund is not managed in reference to a benchmark. The objective of the investment policy is to generate long-term capital appreciation for the sub-fund. In order to achieve this, the Fund will invest in shares of, and entering into financial contracts (derivatives) relating to, predominantly German companies and companies active in Germany. The selection of investments is proposed by the asset allocation adviser (pfp Advisory GmbH), which is amongst others based on recognized financial ratios and market position, and the allocation of assets is based primarily on this advice. The Fund may invest in large, medium and small companies, based on the value of the shares of a company compared to other companies. The shares may be chosen on the basis that they are regarded as undervalued. Alternatively, where the stock markets are rising, the shares will be selected on the basis that their value is rising in line with stock markets. The Fund may also invest in non-German companies and other investment funds. The Fund intends to invest no more than 10% of its value (or more on a temporary basis) in cash and short term tradable debt. The return of the product is reflected by the daily calculated net asset value per unit and the distribution amount if applicable. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. This fund is a sub-fund of DWS Concept for which the sales prospectus and the periodic reports are prepared as a whole. The assets and liabilities of each sub-fund are segregated by law. As a result, assets of one sub-fund are not available in the event of claims against or insolvency of another. More share classes may be available for this fund - please refer to the relevant section of the sales prospectus for further details. Shares may in many cases be exchanged for shares of another share class in the same or another DWS Concept SICAV sub-fund. Details can be found in the "Exchange of shares" section of the sales prospectus. The depositary is State Street Bank International GmbH, Luxembourg Branch. More detailed information on this fund, such as the sales prospectus as well as the latest annual and semi-annual report, can be obtained free of charge online at www.dws.com. Select your country of residence on the website, enter the fund name in the search bar and select the desired documents under "Downloads".

Intended retail investor

The sub-fund is intended for long term professional investors with basic/advanced knowledge/experience, who can bear losses. The sub-fund can be used for general capital accumulation.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

The following is applicable if you subscribe for or settle shares in a different currency than the fund or share-class currency: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The following risks could be of particular significance for the fund: Derivatives risk, Concentration risk. A more detailed description of risks and other general information can be found in the risk section(s) of the sales prospectus. You may lose some or all of your investment. Your risk is limited to the amount invested. This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product and a suitable benchmark over the last 12 years. Markets could develop very differently in the future.

Recommended holding period: Example Investment:	7 years 10.000 EUR	
	If you exit after 1 year	If you exit after 7 years
Scenarios		

Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs Average return each year	4,440 EUR -55.6 %	2,560 EUR -17.7 %
Unfavourable	What you might get back after costs Average return each year	7,190 EUR -28.1 %	10,450 EUR 0.6 %
Moderate	What you might get back after costs Average return each year	10,820 EUR 8.2 %	17,260 EUR 8.1 %
Favourable	What you might get back after costs Average return each year	16,020 EUR 60.2 %	23,570 EUR 13.0 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. For the 1 year holding period the following applies: This type of scenario (Favourable, Moderate, Unfavourable) occurred for an investment - possibly with reference to CDAX - between (Favourable: 30.10.2020-29.10.2021, Moderate: 28.06.2019-30.06.2020, Unfavourable: 30.09.2021-30.09.2022). For the recommended holding period the following applies: This type of scenario (Favourable, Moderate, Unfavourable) occurred for an investment - possibly with reference to CDAX - between (Favourable: 28.12.2018-30.12.2025, Moderate: 31.05.2018-30.05.2025, Unfavourable: 30.12.2021-31.03.2026).

What happens if DWS Investment S.A. is unable to pay out?

The assets of the fund are kept separately from those of the management company, DWS Investment S.A.. An insolvency or default of the management company should not result in the fund suffering any financial loss in relation to its assets. On the insolvency or default of the depositary State Street Bank International GmbH, Luxembourg Branch securities held by the depositary on behalf of the fund should be protected but the fund may suffer loss in relation to cash and certain other assets which are not protected. Cash deposits of the fund deposited with other credit institutions may cause investors to suffer a financial loss if such deposits are not covered by any existing deposit guarantee schemes. Investment in the fund is not covered by any investor compensation or guarantee scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. 10.000 EUR is invested.

	If you exit after 1 year	If you exit after 7 years
Total costs	159 EUR	1,465 EUR
Annual cost impact (*)	1.6 %	1.6 % each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.7% before costs and 8.1% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

How long should I hold it and can I take money out early?

Recommended holding period: 7 years. The product has no minimum holding period.

This product has no required minimum holding period. The recommended holding period has been selected due to its investment strategy and because it is designed for a long term investment horizon. It is expected that it will be possible to achieve the investment objective of the fund within this time frame. You may request the redemption of shares generally on each valuation date. No fees or penalties will be charged by the company for any such transaction.

There is no change on the risk return profile when you redeem your shares early. The asset management company may suspend the issue and redemption of shares if exceptional circumstances mean this appears necessary taking into account the investors' interests. The asset management company may use the following methods to manage liquidity risks: It may restrict redemption if the investors' redemption requests reach a previously defined threshold as of which the redemption requests can no longer be executed in the interests of all

investors. By using swing pricing, it may apportion the costs arising from redemptions (e.g., transaction costs) to the investors whose orders caused the trades, thus reducing the risk of dilution for the fund's remaining investors. Further details can be found in the Sales Prospectus.
