What is this product?

Type

The product is a UCITS - Part 1 FCP under Luxembourg law.

Term

This product is an open-ended fund without predefined maturity. You may request the redemption of shares generally on each valuation date. The company may, however, suspend the redemption if extraordinary circumstances appear to make this necessary, taking into account the interests of the investors. Further, the company may restrict the redemption. The product may be redeemed early in certain circumstances as set out in the sales prospectus. The LC share class of ARERO - Der Weltfonds - ESG was launched in 2020.

Objectives

The fund is actively managed. The fund is not managed in reference to a benchmark. The fund promotes environmental and social characteristics and is subject to the disclosure requirements of a financial product in accordance with article 8(1) of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector. More ESG information is available in the sales prospectus and on the DWS website. The objective of the investment policy is to generate capital appreciation. To achieve this, the fund invests in the equity, bond and commodity asset classes. The equity and bond investments are reflected through direct investments, while the investment in the commodity markets takes place with the aid of derivative instruments (financial instruments whose value depends on the performance of one or more underlyings, e.g. a security) such as, in particular, commodity index swaps and total return swaps. This strategy is called the ARERO global strategy. The weighting of the asset classes is adjusted to 60% equities, 25% European corporate bonds and 15% commodities on the fifth business day in May and November of each year. On account of this configuration, the fund comprises the equity portfolio, bond portfolio and derivative components (especially swaps), whereby at least 51% of the fund's gross assets is invested in equity participations. The ARERO equity strategy is pursued for the equity asset class and makes use of the following indices for allocating assets: Solactive GBS North America Large & Mid Cap USD Index TR, Solactive GBS Developed Market Europe Large & Mid Cap EUR Index TR, Solactive GBS Developed Market Pacific Large & Mid Cap USD Index TR & Solactive GBS Emerging Markets Large & Mid Cap USD Index TR. The ARERO bond strategy, which is oriented toward the Solactive EuroZONE Government Bond Index TR, is pursued for the bond asset class. The ARERO commodity strategy, which is oriented toward the Bloomberg ex-Agriculture and Livestock 15/30 Capped 3 Month Forward Total Return Index, is pursued for the commodity asset class. When selecting suitable investments, environmental and social aspects and the principles of good corporate governance (ESG criteria) are taken into consideration alongside the financial performance. At least 80% of the fund's net assets are invested in assets that are aligned with the promoted environmental and social characteristics. The selection of the individual investments is at the discretion of the fund management. The return of the product can be derived from the share price that is calculated daily plus any distribution. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. More share classes may be available for this fund - please refer to the relevant section of the sales prospectus for further details. The depositary is State Street Bank International GmbH, Luxembourg Branch. What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

The following is applicable if you subscribe for or settle shares in a different currency than the fund or share-class currency: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The following risks could be of particular significance for the fund: Risk of default. A more detailed description of risks and other general information can be found in the risk section(s) of the sales prospectus. You may lose some or all of your investment. Your risk is limited to the amount invested. This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example Investment:		5 years 10.000 EUR	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs Average return each year	5,150 EUR -48.5 %	5,240 EUR -12.1 %

What happens if DWS Investment S.A. is unable to pay out?

The assets of the fund are kept separately from those of the management company, DWS Investment S.A.. An insolvency or default of the management company should not result in the fund suffering any financial loss in relation to its assets. On the insolvency or default of the depositary State Street Bank International GmbH, Luxembourg Branch securities held by the depositary on behalf of the fund should be protected but the fund may suffer loss in relation to cash and certain other assets which are not protected. Cash deposits of the fund deposited with other credit institutions may cause investors to suffer a financial loss if such deposits are not covered by any existing deposit guarantee schemes. Investment in the fund is not covered by any investor compensation or guarantee scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. 10.000 EUR is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	58 EUR	346 EUR
Annual cost impact (*)	0.6 %	0.6 % each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.6% before costs and 7.0% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years. The product has no minimum holding period.

This product has no required minimum holding period. The recommended holding period has been selected due to its investment strategy and because it is designed for a medium term investment horizon. It is expected that it will be possible to achieve the investment objective of the fund within this time frame. You may request the redemption of shares generally on each valuation date. No fees or penalties will be charged by the company for any such transaction.

There is no change on the risk return profile when you redeem your shares early.

How can I complain?
