## What is this product?

### Type

The product is a UCITS - Part 1 FCP under Luxembourg law.

### Term

This product is an open-ended fund without predefined maturity. You may request the redemption of shares generally on each valuation date. The Company may, however, suspend the redemption if extraordinary circumstances appear to make this necessary, taking into account the interests of the investors. The product may be redeemed early in certain circumstances as set out in the sales prospectus. The LC share class of AL GlobalAktiv+ was launched in 2008.

### Objectives

The fund is actively managed. The fund is not managed in reference to a benchmark. The fund promotes environmental and social characteristics and is subject to the disclosure requirements of a financial product in accordance with article 8(1) of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector. More ESG information is available in the sales prospectus and on the DWS website. The objective of the investment policy is to achieve appreciation of capital in euro. Here, the fund uses a dynamic capital preservation strategy where, depending on the market, investments are reallocated between a growth component (e.g., equity funds) and a capital preservation component (e.g., money market investments). The share of the growth component can fluctuate between 0% and 100%. When selecting suitable investments, environmental and social aspects and the principles of good corporate governance (ESG criteria) are taken into consideration alongside the financial performance. At least 80% of the fund's net assets are invested in assets that are aligned with the promoted environmental and social characteristics. The selection of individual investments is at the discretion of the fund management. The fund has a guarantee by DWS Investment S.A. that the net asset value per share during a given month shall not be less than 80% of the net asset value per share on that last valuation date of the previous month. The guarantee structure is not suitable for the long-term hedging of the investment capital. The return of the product is reflected by the daily calculated net asset value per unit and the distribution amount if applicable. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. More share classes may be available for this fund - please refer to the relevant section of the sales prospectus for further details. The depositary is State Street Bank International GmbH, Luxembourg Branch. More detailed information on this fund, such as the sales prospectus as well as the latest annual and semi-annual report, can be obtained free of charge online at [www.dws.com](http://www.dws.com). Select your country of residence on the website, enter the fund name in the search bar and select the desired documents under "Downloads".

### Intended retail investor

The sub-fund is intended for medium term retail investors with basic knowledge/experience, who can bear losses. The sub-fund can be used for general capital accumulation purposes.

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

**The following is applicable if you subscribe for or settle shares in a different currency than the fund or share-class currency: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

The following risks could be of particular significance for the fund: Risk of guarantee default. A more detailed description of risks and other general information can be found in the risk section(s) of the sales prospectus. You may lose some or all of your investment. Your risk is limited to the amount invested.

You are entitled to receive back at least 80.00 % of your capital. Any amount over this, and any additional return, depends on future market performance and is uncertain. The following limitations also apply: If changes in taxes during the guarantee period have a detrimental effect on the sub-fund's performance, the guarantee will be reduced by the amount of this difference per share, including lost market-based and time-based reinvestments. This product does not include full protection from future market performance so you could lose some or all of your investment. However, you may benefit from a consumer protection scheme (see the section 'What happens if DWS Investment S.A. is unable to pay out?'). The indicator shown above does not consider this protection.

### Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

**Recommended holding period:**  
**Example Investment:**

5 years  
10.000 EUR

|                     |  | If you exit after 1 year | If you exit after 5 years |

| <b>Scenarios</b>    |  |                          |                           |
| <b>Minimum</b>      | 8,000 EUR. The return is only guaranteed if you do not redeem the shares before the guarantee date. DWS Investment S.A. guarantees that the net asset value per share of the fund plus any distributions during the monthly settlement periods will not be less than 80% of the net asset value determined on the last valuation date of the prior settlement period. The guaranteed value is determined respectively on the last valuation date of a month and is valid for the following calendar month. |                          |                           |
| <b>Stress</b>       | <b>What you might get back after costs</b><br>Average return each year   | 6,530 EUR<br>-34.7 %     | 4,890 EUR<br>-13.3 %      |
| <b>Unfavourable</b> | <b>What you might get back after costs</b><br>Average return each year   | 9,480 EUR<br>-5.2 %      | 10,720 EUR<br>1.4 %       |
| <b>Moderate</b>     | <b>What you might get back after costs</b><br>Average return each year   | 10,740 EUR<br>7.4 %      | 14,210 EUR<br>7.3 %       |
| <b>Favourable</b>   | <b>What you might get back after costs</b><br>Average return each year   | 12,210 EUR<br>22.1 %     | 18,960 EUR<br>13.6 %      |

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. The favourable, moderate and unfavourable scenario values are the best to worst case outcomes based on a distribution of historical returns over different periods of time.

### What happens if DWS Investment S.A. is unable to pay out?

The assets of the fund are kept separately from those of the management company, DWS Investment S.A.. An insolvency or default of the management company should not result in the fund suffering any financial loss in relation to its assets. On the insolvency or default of the depositary State Street Bank International GmbH, Luxembourg Branch securities held by the depositary on behalf of the fund should be protected but the fund may suffer loss in relation to cash and certain other assets which are not protected. Cash deposits of the fund deposited with other credit institutions may cause investors to suffer a financial loss if such deposits are not covered by any existing deposit guarantee schemes. Investment in the fund is not covered by any investor compensation or guarantee scheme. The following risks could be of particular significance for the fund: If the guarantor becomes insolvent, this may void the guarantee.

### What are the costs?

**The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.**

#### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. 10.000 EUR is invested.

|                        | If you exit after 1 year | If you exit after 5 years |
|------------------------|--------------------------|---------------------------|
| Total costs            | 143 EUR                  | 853 EUR                   |
| Annual cost impact (*) | 1.4 %                    | 1.4 % each year           |

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.7% before costs and 7.3% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

#### Composition of costs

| One-off costs upon entry or exit                            |  | If you exit after 1 year |
|---|--|--------------------------|
| Entry costs   | We do not charge an entry fee.   | 0 EUR                    |
| Exit costs  | We do not charge an exit fee.  | 0 EUR                    |
| Ongoing costs taken each year                               |  |                          |
| Management fees and other administrative or operating costs | 1.24 % of the value of your investment per year. This is an estimate based on actual costs for the fiscal year ending 31.12.2025.  | 124 EUR                  |
| Transaction costs   | 0.19 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | 19 EUR                   |
| Incidental costs taken under specific conditions            |  |                          |
| Performance fees  | We do not charge a performance fee.  | 0 EUR                    |

### How long should I hold it and can I take money out early?

**Recommended holding period: 5 years. The product has no minimum holding period.**

This product has no required minimum holding period. The recommended holding period has been selected due to its investment strategy and because it is designed for a medium term investment horizon. It is expected that it will be possible to achieve the investment objective of the fund within this time frame. You may request the redemption of shares generally on each valuation date. No fees or penalties will be charged by the company for any such transaction.

There is no change on the risk return profile when you redeem your shares early.
