CROCI Performance Report

January 2026

© DWS 2026. Report prepared on 2 February 2026

MARKETING MATERIAL

This information has been prepared by and is being delivered to the recipient on a confidential basis by the Issuer for the sole purpose of providing information.

EMEA: For Professional Clients (MiFID Directive 2014/65/EU Annex II) only. No distribution to private/retail investors.

In MENA for professional Clients. Further distribution of this material is strictly prohibited. For business customers only

For Investors in Switzerland: For Qualified Investors (Art. 10 Para. 3 of the Swiss Federal Collective Investment Schemes Act (CISA)).

For Investors in Singapore and Hong Kong: This material is provided to addressees only who are institutional / accredited investors in Hong Kong / Singapore respectively (or equivalent classification in other jurisdiction). Further distribution of this material is strictly prohibited.

Australia and New Zealand: For Wholesale Investors only

Korea: This material has been provided upon your specific request on a reverse solicitation basis

This document does not constitute investment advice nor stock recommendation.

For Argentina, Brasil, Chile and Mexico: For Institutional investors only. Further distribution of this material is strictly prohibited.

This document is intended purely as marketing material for professional/qualified investors only, and not for distribution into the USA.

This document has been produced by the CROCI team of DWS and represents the views of only the CROCI team. It does not constitute investment advice, investment recommendation or independent research. The CROCI team bases its views on the application of the CROCI valuation methodology as well as its own views on the financial markets. The CROCI team does not manage client portfolios.

This document does not constitute marketing of any product connected to CROCI Strategies or an offer, an invitation to offer or a recommendation to enter into any product connected to CROCI Strategies. This material has been deemed falling under the MIFID definition of marketing material as not presented as an objective or independent piece of research accordance with Article 24 section 1.a (Article 19.2 in directive 2004/39/EG) of implementation directive 2004/39/EC.

Appendix	39

Key Risk Factors:

Past Performance: The CROCI Strategies level may rise or fall. Any products linked to a CROCI Strategy may not be capital protected and investor capital may be at risk. The value of investment products linked to the CROCI Strategies may go down as well as up. Past performance, whether live or simulated, is not a reliable indicator of future results.

Membership and performance of CROCI Strategies prior to their going live is simulated. The simulations apply an investment strategy retrospectively to data that was in part reconstructed and not necessarily available at the time. As a consequence there may be instances when realised returns would have shown variation from those simulated and the latter may have had the advantage of hindsight.

The CROCI Model: The Concentrated Value Strategies have been built on the CROCI premise that stocks with lower CROCI Economic P/E ratios may outperform stocks with higher CROCI Economic P/E ratios over time. This premise may not be correct and prospective investors should evaluate this assumption prior to investing in these Strategies. CROCI represents one of the many possible ways to analyze and value stocks. Potential investors must form their own view of the CROCI methodology and evaluate whether CROCI and investments associated with CROCI are appropriate for them.

Sustainable Dividends Assumption: The CROCI Dividend Strategies make the assumption that Dividend Yield, Cash Returns, Financial Leverage and Price Volatility can impact the ability for companies to maintain their dividend payments as well as provide performance. This premise may not be correct and prospective investors should evaluate this assumption prior to investing in the Strategy. There is no implied assurance that a stock in the CROCI Global Dividends Strategy and/or CROCI US Dividends Strategy will not cut its dividend while it is in the Strategy.

The CROCI ESG Innovation Leaders Strategy (renamed from CROCI Intellectual Capital Strategy w.e.f. Aug. 2024) has been built on the premises that:

- 1) Both R&D and Brands are form of intangible assets and are captured as capitalised intangibles in the CROCI model;
- 2) Companies with intangible assets as such may outperform companies without intangibles;
- 3) Financial Leverage and Risk-Adjusted CROCI can impact the ability for companies to maintain or grow their intangible assets as well as provide performance;
- 4) CROCI equity earnings are a suitable basis for the construction of portfolio weightings.

These premises may not be correct and prospective investors should evaluate these assumptions prior to investing in this Strategy. Note also that this Strategy excludes any companies without capitalised intangibles in the CROCI model (either in form of R&D or Brands), and therefore excludes large parts of entire sectors that have low exposure to intangible assets such as Financials and Utilities.

Important Notice: CROCI was part of DB Markets Research until 15 Oct. 2013, any content published after this date does not constitute independent investment research but should be deemed marketing material created by the CROCI team, which is now part of DWS.

Important Information: All CROCI Concentrated Strategies in this Report except CROCI ESG Innovation Leaders underwent minor implementation changes on 2 Jun. 2014:

- 1) Change of reconstitution frequency from monthly to quarterly (with the exception of CROCI Global Dividends and CROCI US Dividends which were already reconstituted on a quarterly basis prior to this date);
- 2) Introduction of selection buffers to reduce constituent turnover.

What is a "selection buffer"? By way of example, consider a portfolio consisting of the 40 stocks with lowest Economic P/E, and a 5-stock selection buffer. Without the buffer, a stock moving from rank 40 to rank 41 would be replaced in the portfolio. With the buffer, an existing constituent is only replaced if it no longer ranks among the 45 cheapest stocks (by Economic P/E) on the selection date. A new constituent will only enter the portfolio if it is within the 40 cheapest stocks (by Economic P/E) on the selection date.

- 3) CROCI Sectors increased selection pool to Pan-Europe and full US coverage and introduced a sector buffer to reduce turnover.

- 4) Removal of "backfill rule" from CROCI Sectors Strategy (4th June 2014).

What is a "backfill rule"? The CROCI Sectors Strategy selects 30 stocks. Under the old "backfill rule", stocks chosen from a sector had to be below the median Economic P/E of their respective sector. Where not possible (i.e. when a sector has fewer than 20 stocks in the selection pool), the backfill rule required that the portfolio be filled up by selecting stocks with lowest Economic P/E from the remaining six sectors. This resulted occasionally in exposure to more than three sectors. Since the backfill rule was removed, the CROCI Sectors Strategy always selects 10 stocks from each of the three selected sectors

The aim of these changes (quarterly reconstitution and introduction of buffers) is to reduce portfolio turnover and transaction costs. The CROCI Team believes that these revisions should reduce turnover while having little or no impact on the exposure to real value. Backtests simulating these changes suggest that they would have had no material negative impact on the performance of CROCI Strategies: assuming 50 bps transaction costs, backtests for the period 2 Feb. 2004 - 31 Mar. 2014 indicate that the annualised returns of CROCI US, CROCI Euro, CROCI Japan, CROCI World Value, CROCI Sectors, and CROCI Global Dividends would have been at least 70 bps higher with buffers and quarterly rebalancing than without these measures. The annualised return of CROCI US Dividends would have been 7 bps lower with buffers and quarterly rebalancing than without these measures.

Effective 28 May 2025, the CROCI US Strategy, CROCI Euro Strategy, CROCI Japan Strategy, and CROCI World Value Strategy no longer exclude companies from the Financials sector, which are in CROCI coverage.

Implementation of ESG Characteristics in CROCI Concentrated Strategies:

Effective 1st Jan. 2022, all CROCI Concentrated Strategies in this report, except CROCI ESG Innovation Leaders, incorporated environmental, social and governance (ESG) characteristics based on DWS Basic Exclusions, a DWS proprietary ESG assessment methodology, provided by DWS ESG Engine.

These facets seek to attain environmental and social characteristics by assessing potential investments via a proprietary ESG assessment methodology irrespective of economic prospects of success. This methodology is based on the ESG database (DWS ESG Engine), which uses data from multiple ESG data providers (a list of data providers is available at www.dws.com/solutions/esg), public sources and internal assessments (based on a defined assessment and classification methodology) to derive combined scores.

Effective 17th Jan. 2020, CROCI ESG Innovation Leaders ESG Strategy incorporated environmental, social and governance (ESG) characteristics based on DWS ESG Investment Standard, a DWS proprietary ESG assessment methodology, provided by DWS ESG Engine.

These facets seek to attain environmental and social characteristics by assessing potential investments via a proprietary ESG assessment methodology irrespective of economic prospects of success. This methodology is based on the ESG database (DWS ESG Engine), which uses data from multiple ESG data providers (a list of data providers is available at www.dws.com/solutions/esg), public sources and internal assessments (based on a defined assessment and classification methodology) to derive combined scores.

Past performance, whether live or simulated, is not a reliable indicator of future results. Performance is shown gross of fees and does not reflect investment advisory fees. Had such fees been deducted, returns would have been lower. Allocations are subject to change without notice. This document is intended purely as marketing material for professional/qualified investors only. This document is strictly confidential. This information is intended for informational purposes only and does not constitute investment advice, a recommendation, an offer or solicitation. No distribution is allowed into the USA

ESG

Environmental, social and governance – a collective term referring to all aspects considered conducive to sustainability

DWS ESG Engine

The DWS ESG Engine is a DWS proprietary software system that uses data from five leading ESG data providers (ISS-ESG, MSCI, ESG Book, Morningstar Sustainability and S&P Trucost), as well as ESG data from publicly available sources and proprietary DWS research.

DWS ESG Assessment

This sustainability indicator measures the weight of those companies in the fund or benchmark that are identified as ESG leaders or laggards. ESG leaders and laggards are identified in the DWS ESG Engine using a best-in-class ESG approach, which takes into account a wide range of environmental, social and corporate governance criteria (e. g. resource management, contribution to climate change, product responsibility, corporate ethics). Best-in-class means that issuers are rated relative to their reference group. The reference group is determined by the region (developed countries vs. emerging countries) and industry (not applicable to countries). The DWS ESG quality assessment ranks issuers on a scale of A-F, whereas a grade of A and B identifying ESG leaders and a grade of E and F ESG laggards.

DWS Basic Exclusion Filter

The implementation of DWS Basic Exclusions, seeks to eliminate securities from the investment universe if the issuer of the security does not meet the DWS Engine's DWS Basic Exclusions criteria. Hence the investor is not exposed to the financial return of the excluded securities. The impact of the exclusion on the investor's portfolio return cannot be guaranteed. Financial return considerations do, under no circumstance, influence the ESG exclusion process. It is possible that the information or data on which an exclusion is based is wrong, not available or not available in time. In the event of delayed information, the exclusion is not performed, but will be once the information is confirmed. Potential investors should confirm that the ESG rule framework that DWS applies is consistent with their expectations and views concerning ESG.

DWS ESG Assessment methodology / exclusion criteria		DWS Basic Exclusions [transparent pursuant to Article 8 of the Regulation (EU) 2019/2088]
		Assessment ¹ or revenue threshold ²
DWS Group policies	DWS Coal Policy (coal mining and power generation from coal \geq 25% revenue; coal expansion plans) ³	Non-compliant
	DWS Controversial Weapons Statement (cluster munition, anti-personnel mines, biological and chemical weapons) ⁴	Non-compliant
Controversial sectors (excl. climate)	Manufacturing and/or distribution of civil handguns or ammunition	\geq 5%
	Manufacturing of tobacco products	\geq 5%
Climate-related assessments	Mining of oil sand	\geq 5%
General ESG assessments	Freedom House Status (sovereigns)	"Not free"
	Good Governance is measured with Norm Controversy Grade (corporates)	F / M

For ESG filter terminologies

1) DWS Assessment scheme

In some of the assessment approaches, issuers receive one of six possible assessments, with "A" representing the best and "F" the worst assessment. If an issuer is excluded based on one assessment approach, the sub-fund is prohibited from investing in that issuer.

2) Revenue threshold

Shown is the %-revenue threshold which, when it is greater or equal to, triggers an exclusion. The assessment approaches include, for example, exclusions related to revenues generated from controversial sectors or the exposure to such controversial sectors.

'Non-compliant' means that a company that does not adhere to the guidelines set out in the DWS Policies will be excluded from investments.

3) Coal

Companies that derive 25% or more from thermal coal mining and thermal coal-based power generation as well as companies with thermal coal expansion plans, such as additional expansion of coal mining, coal production or coal usage. Companies with thermal coal expansion plans are excluded based on an internal identification methodology. In the event of exceptional circumstances, such as measures imposed by a government to address challenges in the energy sector, the Management Company may decide to temporarily suspend the application of the coal-related exclusions to individual companies/geographical regions.

For more information about the DWS Coal Policy, please visit the following website <https://www.dws.com/en-lu/solutions/sustainability/information-on-sustainability/>

4) Companies are excluded if they are identified as being involved in the manufacturing or selling of controversial weapons or key components of controversial weapons (anti-personnel mines, cluster munitions, chemical and biological weapons). In addition, the shareholdings within a group structure may be taken into consideration for the exclusions.

For more information about the DWS Controversial Weapons Statement, please visit the following website <https://www.dws.com/en-lu/solutions/sustainability/information-on-sustainability/>

DWS ESG Investment Standard Filter

The implementation of DWS ESG Investment Standard filter, seeks to eliminate securities from the investment universe if the issuer of the security does not meet the DWS Engine's DWS ESG Investment Standard criteria. Hence the investor is not exposed to the financial return of the excluded securities. The impact of the exclusion on the investor's portfolio return cannot be guaranteed. Financial return considerations do, under no circumstance, influence the ESG exclusion process. It is possible that the information or data on which an exclusion is based is wrong, not available or not available in time. In the event of delayed information, the exclusion is not performed, but will be once the information is confirmed. Potential investors should confirm that the ESG rule framework that DWS applies is consistent with their expectations and views concerning ESG

Past performance, whether live or simulated, is not a reliable indicator of future results. Performance is shown gross of fees and does not reflect investment advisory fees. Had such fees been deducted, returns would have been lower. Allocations are subject to change without notice. This document is intended purely as marketing material for professional/qualified investors only. This document is strictly confidential. This information is intended for informational purposes only and does not constitute investment advice, a recommendation, an offer or solicitation. No distribution is allowed into the USA

ESMA: At least 80% of the sub-fund's net assets are invested in assets covered by the DWS ESG Investment Standard

DWS ESG Investment Standard

[transparent pursuant to Article 8 of the Regulation (EU) 2019/2088]

DWS ESG Assessment methodology / exclusion criteria		Assessment ¹ or revenue threshold ²
DWS Group policies	DWS Coal Policy (coal mining and power generation from coal \geq 25% revenue; coal expansion plans) ³	Non-compliant
	DWS Controversial Weapons Statement (cluster munition, anti-personnel mines, biological and chemical weapons) ⁴	Non-compliant
Controversial sectors (excl. climate)	Other controversial weapons (depleted uranium weapons, incendiary bombs containing white phosphorus, non-detectable fragmentation ammunition, blinding laser device) ⁴	Involvement
	Manufacturing or selling of nuclear weapons or key components of nuclear weapons	Involvement
	Manufacturing of products and/or provision of services in the defence industry	\geq 5%
	Manufacturing and/or distribution of civil handguns or ammunition	\geq 5%
	Manufacturing of palm oil	\geq 5%
	Cultivation and production of tobacco	\geq 0%
	Manufacturing of adult entertainment	\geq 5%
	Manufacturing of products in and/or provision of services for the gambling industry	\geq 5%
Climate-related assessments	Nuclear power generation and/or uranium mining and/or uranium enrichment	\geq 5%
	Unconventional extraction of crude oil and/or natural gas (including oil sand, oil shale/shale gas, Arctic drilling)	$>$ 0%
	Exploration, mining, extraction, distribution or refining of hard coal and lignite	\geq 1 %
	Exploration, extraction, distribution or refining of oil fuels	\geq 10%
	Exploration, extraction, distribution or refining of gaseous fuels	\geq 50%
General ESG assessments	Electricity generation with a GHG intensity of more than 100 g CO ₂ e/kWh	\geq 50%
	DWS ESG Quality Assessment (corporates & sovereigns)	F
	Freedom House Status (sovereigns)	"Not free"
	MSCI OECD Alignment (corporates)	"Fail"
	Good Governance is measured with Norm Controversy Assessment (corporates)	F / M

1) DWS Assessment scheme

In some of the assessment approaches, issuers receive one of six possible assessments, with "A" representing the best and "F" the worst assessment. If an issuer is excluded based on one assessment approach, the sub-fund is prohibited from investing in that issuer.

2) Revenue threshold

Shown is the %-revenue threshold which, when it is greater or equal to, triggers an exclusion. The assessment approaches include, for example, exclusions related to revenues generated from controversial sectors or the exposure to such controversial sectors.

'Non-compliant' means that a company that does not adhere to the guidelines set out in the DWS Policies will be excluded from investments.

3) Coal

Companies that derive 25% or more from thermal coal mining and thermal coal-based power generation as well as companies with thermal coal expansion plans, such as additional expansion of coal mining, coal production or coal usage. Companies with thermal coal expansion plans are excluded based on an internal identification methodology.

For more information about the DWS Coal Policy, please visit the following website <https://www.dws.com/en-lu/solutions/sustainability/information-on-sustainability/>

4) Companies are excluded if they are identified as being involved in the manufacturing or selling of controversial weapons or key components of controversial weapons or other related specific activities (anti-personnel mines, cluster munitions, chemical and bio-logical weapons, blinding laser weapons, weapons with non-detectable fragments, depleted uranium weapons/munitions and/or incendiary weapons using white phosphorus). In addition, the shareholdings within a group structure may be taken into consideration for the exclusions.

CROCI World Value EUR Strategy						Live from 29 Nov. 2010			
	1M	3M	6M	YTD	1Y	Annualised (if more than 1 Year)			
						3Y	5Y	10Y	Since Live
CROCI World Value (EUR)	1.9%	6.1%	10.9%	1.9%	4.2%	8.6%	12.5%	11.4%	11.3%
MSCI World Value (EUR)	3.4%	5.5%	9.7%	3.4%	5.7%	11.1%	13.1%	9.3%	9.7%
MSCI World (EUR)	0.9%	0.3%	7.4%	0.9%	4.5%	15.7%	13.3%	12.0%	11.8%
Excess Return vs. Benchmark									
vs. MSCI World Value (EUR)	-1.5%	0.6%	1.2%	-1.5%	-1.5%	-2.5%	-0.6%	2.0%	1.7%
vs. MSCI World (EUR)	0.9%	5.8%	3.5%	0.9%	-0.3%	-7.2%	-0.9%	-0.7%	-0.5%

NB. CROCI Concentrated Strategies except CROCI ESG Innovation Leaders underwent minor implementation changes on 2 Jun. 2014: 1) Change of reconstitution frequency from monthly to quarterly; 2) Introduction of selection buffers to reduce constituent turnover. For Sectors, increased selection pool size in Europe and US and introduced sector buffer to reduce sector turnover.

Returns include reinvestment of dividends net of withholding tax and are unhedged in currencies shown. Benchmark indices, where available, reflect total returns net of dividend withholding tax (refer to the Appendix for more information on benchmark tickers used). Where no currency is shown, returns are in respective region's local currency. Strategy performance prior to the live date is simulated. The Simulations apply an investment strategy retrospectively to data that was in part reconstructed and not necessarily available at the time. As a consequence there may be instances when realised returns would have shown variation from those simulated and the latter may have had the advantage of hindsight. Please refer to the disclosures for more information. Source: DWS, Bloomberg Finance LP

Past performance, whether live or simulated, is not a reliable indicator of future results. Performance is shown gross of fees and does not reflect investment advisory fees. Had such fees been deducted, returns would have been lower. Allocations are subject to change without notice. This document is intended purely as marketing material for professional/qualified investors only. This document is strictly confidential. This information is intended for informational purposes only and does not constitute investment advice, a recommendation, an offer or solicitation. No distribution is allowed into the USA

NB. CROCI Concentrated Strategies except CROCI ESG Innovation Leaders underwent minor implementation changes on 2 Jun. 2014: 1) Change of reconstitution frequency from monthly to quarterly; 2) Introduction of selection buffers to reduce constituent turnover. For Sectors, increased selection pool size in Europe and US and introduced sector buffer to reduce sector turnover.

Returns include reinvestment of dividends net of withholding tax and are unhedged in currencies shown. Benchmark indices, where available, reflect total returns net of dividend withholding tax (refer to the Appendix for more information on benchmark tickers used). Where no currency is shown, returns are in respective region's local currency. Strategy performance prior to the live date is simulated. The Simulations apply an investment strategy retrospectively to data that was in part reconstructed and not necessarily available at the time. As a consequence there may be instances when realised returns would have shown variation from those simulated and the latter may have had the advantage of hindsight. Please refer to the disclosures for more information. Source: DWS, Bloomberg Finance LP

Past performance, whether live or simulated, is not a reliable indicator of future results. Performance is shown gross of fees and does not reflect investment advisory fees. Had such fees been deducted, returns would have been lower. Allocations are subject to change without notice. This document is intended purely as marketing material for professional/qualified investors only. This document is strictly confidential. This information is intended for informational purposes only and does not constitute investment advice, a recommendation, an offer or solicitation. No distribution is allowed into the USA

¹ 'Net Total Return' is the total return of the CROCI Strategy gross of product fees but including reinvested dividends net of withholding tax. 'Active Return' shows excess return of the CROCI Strategy relative to its benchmark

² 'Sources of Active Return' shows contributions to 'Active Return' resulting from Sector Allocation, Stock Selections within a sector, and/or difference in Currency exposures relative to benchmark. The calculations are performed using the MSCI Barra Model and may vary from actual strategy active return due to differences in computational methodology.

³ 'Sector Allocation' shows the top three positive/negative sectors' contribution to Active return in Local currency (shown in parenthesis), due to difference in Sector exposures (Overweight-OW / Underweight-UW) relative to benchmark.

⁴ 'Stock Selection' shows the top and bottom three companies' contribution to Active return in Local currency (shown in parenthesis), due to Overweight-OW / Underweight-UW positions of the stocks that out / underperform within a sector in the respective benchmark.

Past performance, whether live or simulated, is not a reliable indicator of future results. Performance is shown gross of fees and does not reflect investment advisory fees. Had such fees been deducted, returns would have been lower. Allocations are subject to change without notice. CROCI Concentrated Strategies

CROCI US Strategy

Reflects the Total Return (gross of fees) of a basket of around 40 equally-weighted stocks selected on a quarterly basis from a broad universe of large-cap US stocks which are covered by the CROCI Team. The portfolio constituents are selected on the basis of low trailing 12-months CROCI price earnings ratio (P/E), according to the CROCI Methodology.

Historical Performance	Live from 2 Feb. 2004

CROCI US Dividends Strategy

Reflects the Total Return (gross of fees) of a basket of around 40 equally-weighted stocks selected on a quarterly basis from a broad universe of large-cap US stocks (excluding financial and real estate stocks) which are covered by the CROCI Team and which have above-median dividend yields while focusing on sustainable dividends. Sustainable dividend screens exclude stocks by low Cash Returns, high Financial Leverage and high Price Volatility. Those stocks that pass the sustainable dividends screens are then selected on the basis of low trailing 12-months CROCI price earnings ratio (P/E), according to the CROCI Methodology.

The CROCI Euro Strategy underwent minor implementation changes on 2 Jun. 2014: 1) Change of reconstitution frequency from monthly to quarterly; 2) Introduction of selection buffers to reduce constituent turnover. Please refer to page 3 for more details regarding these changes.

Returns in EUR, include reinvestment of dividends net of withholding tax and are unhedged. Benchmark indices, where available, reflect total returns net of dividend withholding tax (refer to the Appendix for more information on benchmark tickers used). Performance before the live date of 2 Feb. 2004 is simulated. The Simulations apply an investment strategy retrospectively to data that was in part reconstructed and not necessarily available at the time. As a consequence there may be instances when realised returns would have shown variation from those simulated and the latter may have had the advantage of hindsight.

Source for all data and charts: DWS; Bloomberg Finance LP; Factset Research Systems Inc. Data as of 30 Jan. 2026.

Past performance, whether live or simulated, is not a reliable indicator of future results. Performance is shown gross of fees and does not reflect investment advisory fees. Had such fees been deducted, returns would have been lower. Allocations are subject to change without notice. This document is intended purely as marketing material for professional/qualified investors only. This document is strictly confidential. This information is intended for informational purposes only and does not constitute investment advice, a recommendation, an offer or solicitation. No distribution is allowed into the USA.

CROCI Sectors Plus EUR Strategy

Reflects the Total Return (gross of fees) of a basket of around 30 equally-weighted stocks selected on a quarterly basis from a broad universe of large-cap stocks in US, Europe and Japan (excluding financial and real estate stocks) which are covered by the CROCI Team. Three sectors (out of nine, globally) are selected, based on low sector median economic P/E. Then, 10 companies are selected from each of these three sectors on the basis of low trailing 12-months CROCI price earnings ratio (P/E).

Historical Performance	Live from 18 Nov. 2015

The CROCI Sectors Plus EUR Strategy was inherited from CROCI Sectors EUR Strategy on 18 Nov. 2015. The simulated performance shown prior to this date reflects the performance of CROCI Sectors EUR Strategy, which was run on live basis since 31 Mar. 2005. The CROCI Sectors EUR Strategy underwent minor implementation changes on 2 Jun. 2014: 1) Change of reconstitution frequency from monthly to quarterly; 2) Introduction of selection buffers to reduce constituent turnover; 3) Increased selection pool size in Europe and US; 4) Introduction of sector buffers to reduce sector turnover; 5) removal of "backfill rule". Please refer to page 3 for more details regarding these changes.

Returns in EUR, include reinvestment of dividends net of withholding tax and are unhedged. Benchmark indices, where available, reflect total returns net of dividend withholding tax (refer to the Appendix for more information on benchmark tickers used). Performance before the live date for CROCI Sectors EUR Strategy (31 Mar. 2005) is simulated. The Simulations apply an investment strategy retrospectively to data that was in part reconstructed and not necessarily available at the time. As a consequence there may be instances when realised returns would have shown variation from those simulated and the latter may have had the advantage of hindsight.

Source for all data and charts: DWS; Bloomberg Finance LP; Factset Research Systems Inc. Data as of 30 Jan. 2026.

Past performance, whether live or simulated, is not a reliable indicator of future results. Performance is shown gross of fees and does not reflect investment advisory fees. Had such fees been deducted, returns would have been lower. Allocations are subject to change without notice. The CROCI Sectors Plus EUR Strategy was inherited from CROCI Sectors EUR Strategy on 18 Nov. 2015. The simulated performance shown prior to this date reflects the performance of CROCI Sectors EUR Strategy, which was run on live basis since 31 Mar. 2005. The CROCI Sectors EUR Strategy underwent minor implementation changes on 2 Jun. 2014: 1) Change of reconstitution frequency from monthly to quarterly; 2) Introduction of selection buffers to reduce constituent turnover; 3) Increased selection pool size in Europe and US; 4) Introduction of sector buffers to reduce sector turnover; 5) removal of "backfill rule". Please refer to page 3 for more details regarding these changes.

¹As of 30 Jan. 2026. Based on constituents selected on 16 Dec. 2025. ²Max drawdown was calculated since Mar. 2005

This information is intended for informational purposes only and does not constitute investment advice, a recommendation, an offer or solicitation. No distribution is allowed into the USA.

CROCI Sectors Plus USD Strategy

Reflects the Total Return (gross of fees) of a basket of around 30 equally-weighted stocks selected on a quarterly basis from a broad universe of large-cap stocks in US, Europe and Japan (excluding financial and real estate stocks) which are covered by the CROCI Team. Three sectors (out of nine, globally) are selected, based on low sector median economic P/E. Then, 10 companies are selected from each of these three sectors on the basis of low trailing 12-months CROCI price earnings ratio (P/E).

CROCI Global Dividends EUR Strategy

Reflects the Total Return (gross of fees) of a basket of around 50 equally-weighted stocks selected on a quarterly basis from a broad universe of large-cap stocks in Developed countries (excluding financial and real estate stocks) which are covered by the CROCI Team and which have above-median dividend yields while focusing on sustainable dividends. Sustainable dividend screens exclude stocks by low Cash Returns, high Financial Leverage and high Price Volatility. Those stocks that pass the sustainable dividends screens are then selected on the basis of low trailing 12-months CROCI price earnings ratio (P/E), according to the CROCI Methodology.

CROCI ESG Innovation Leaders EUR Strategy

Reflects the Total Return (gross of fees) of a basket of around 100 stocks selected on a quarterly basis from a broad universe of stocks which are identified by the CROCI Team as having “Intangible assets” as per the CROCI Methodology but excluding stocks with low growth potential and high financial risk. Portfolio optimization is used to determine final constituents and weights based on CROCI Equity Earnings while targeting a risk profile similar to that of the entire list of eligible shares and considering the environmental and social aspects and the principles of good corporate governance (ESG criteria)

Past performance, whether live or simulated, is not a reliable indicator of future results. Performance is shown gross of fees and does not reflect investment advisory fees. Had such fees been deducted, returns would have been lower. Allocations are subject to change without notice. This document is intended purely as marketing material for professional/qualified investors only. This document is strictly confidential. This information is intended for informational purposes only and does not constitute investment advice, a recommendation, an offer or solicitation. No distribution is allowed into the USA.

CROCI ESG Innovation Leaders USD Strategy

Reflects the Total Return (gross of fees) of a basket of around 100 stocks selected on a quarterly basis from a broad universe of stocks which are identified by the CROCI Team as having “Intangible assets” as per the CROCI Methodology but excluding stocks with low growth potential and high financial risk. Portfolio optimization is used to determine final constituents and weights based on CROCI Equity Earnings while targeting a risk profile similar to that of the entire list of eligible shares and considering the environmental and social aspects and the principles of good corporate governance (ESG criteria)

Historical Performance	Live from 15 Apr. 2019

Returns in USD, include reinvestment of dividends net of withholding tax and are unhedged. Benchmark indices, where available, reflect total returns net of dividend withholding tax (refer to the Appendix for more information on benchmark tickers used). Performance before the live date of 15 Apr. 2019 is simulated. The Simulations apply an investment strategy retrospectively to data that was in part reconstructed and not necessarily available at the time. As a consequence there may be instances when realised returns would have shown variation from those simulated and the latter may have had the advantage of hindsight. Please refer to page 3 for the key risk factors relating to the strategy.

Appendix

CROCI

Cash Return on Capital Invested (CROCI) is a cash-flow-based analysis which, by making a series of economic adjustments to traditional accounting data, aims to make non-financial companies comparable - regardless of industry or domicile. The main areas where the “economic data” differ from the accounting data are as follows:

Net Capital Invested (NCI), the economic equivalent of book value, is derived from the reported numbers as follows:

CROCI aims to eliminate the effects of revaluations and inflation so that the CROCI asset base is shown in current cost terms.

Intangible assets (brands and R&D) are capitalised systematically by treating these expenses as investments in fixed assets. Operating leases are brought back on balance sheet and treated as capital invested as well.

Accounting schedules for depreciation are normalised and a measure of economic life is used.

CROCI, the economic equivalent of return on equity, is a real (inflation-adjusted) economic cash return. It is the internal rate of return of gross cash flows (taxed, adjusted EBDIT) over the average asset life of the company's assets against the gross capital invested.

Enterprise Value (EV) is the sum of all the holders having a claim on the company's cash flows. The EV consists of market value of equity, debt and other liabilities with probable claims on future cash flows, including warranties, some provisions, pension underfunding and leases.

EV/NCI is thus the CROCI equivalent of the price-to-book ratio. In the absence of growth, the EV/NCI should be directly proportional to the CROCI. Furthermore, if $CROCI = \text{The Cost of Capital (COC)}$, then EV/NCI should be equal to one. Economic P/E is the CROCI version of the P/E ratio. Conventionally, the P/E ratio can be derived from price-to-book value (P/BV) divided by return on equity (E/BV or RoE). Thus:

Economic P/E = EV/NCI / CROCI

Definitions

Enterprise Value (EV): Market value of equity (market cap), debt, and other liabilities, such as pension underfunding, warranties, leases.

Net Capital Invested (NCI): Estimated replacement value of the economic asset base, comprising the inflation-adjusted tangible assets, capitalised intangible assets (e.g. brands, R&D), leases and net working capital

Cash Return on Capital Invested (CROCI): Real (inflation adjusted) economic cash return on the adjusted asset base, calculated as an internal rate of return over the company's estimated asset life

Economic P/E: EV / (CROCI * NCI) or (EV/NCI)/CROCI

EV/NCI: EV/NCI (Economic Asset multiple)

Dividend Yield: Trailing 12months Total Return – Price Return

Free Cash Flow Yield: Free Cash Flow / EV

Leverage: Current Net Financial Liabilities / Current Market Cap

Trailing numbers calculated as (No. of completed months in FY1)*FY1+(12-No. of completed months in FY1)*FY0.

Regulation S: Shares of the fund are only available for certain non-U.S. persons in select transactions outside the United States, or, in limited circumstances, otherwise in transactions which are exempt in reliance on Regulation S from the registration requirements of the United States Securities Act of 1933, as amended, and such other laws as may be applicable. This document does not constitute an offer to subscribe for shares in the fund. It is directed at professional/sophisticated investors and is for their use and information. This document should not be provided to retail investors. The offering or sale of fund shares may be restricted in certain jurisdictions. For information regarding jurisdictions in which the funds are registered or passported, please contact your sales representative. Fund shares may be sold on a private placement basis depending on the jurisdiction. This document should not be used or distributed in any jurisdiction, other than those in which the funds are authorized, where authorization for distribution is required. DWS Distributors, Inc. is authorized by the fund to facilitate the distribution of shares in certain jurisdictions through dealers, referral agents, sub distributors and other financial intermediaries. Any entity forwarding this material, which is produced by DWS Distributors, Inc. (or an authorized affiliate) in the United States, to other parties takes full responsibility for ensuring compliance with applicable securities laws in connection with its distribution. The shares offered hereby have not been registered under the U.S. Securities Act of 1933, as amended (the "Securities Act") or the securities laws of any state, and are being offered and sold in reliance on exemptions from the registration requirements of the Securities Act and such laws. Because the shares offered hereby are not registered under the Securities Act, or the securities laws of any state, the shares offered hereby are subject to restrictions on transferability and resale and may not be transferred or resold except as permitted under the Securities Act and applicable state securities laws pursuant to registration or exemption therefrom. Pursuant to the rules and restrictions of Regulation S promulgated under the Securities Act, (i) shares will not be offered and sold hereunder in the United States or to U.S. persons (other than distributors) unless the shares are registered under the Securities Act or another exemption is available and (ii) hedging transactions involving those shares may not be conducted unless in accordance with the Securities Act. Shares may be offered privately outside the United States or to or for the benefit of an investor that is not a U.S. Person only in accordance with relevant laws of the jurisdiction where the offer is made.

It is not possible to invest directly in a strategy. The performance of any actual investment products may differ significantly.
