What is this product?

Type

The product is a UCITS - Part 1 sub-fund of a SICAV under Luxembourg law.

Term

This product is an open-ended fund without predefined maturity. You may request the redemption of shares generally on each valuation date. The company may, however, suspend the redemption if extraordinary circumstances appear to make this necessary, taking into account the interests of the investors. Further, the company may restrict the redemption. The product may be redeemed early in certain circumstances as set out in the sales prospectus. Deutsche Bank Best Allocation - Flexible was launched in 2013.

Objectives

The fund is actively managed. The fund is not managed in reference to a benchmark. The objective of the investment policy is to achieve a medium to long-term positive investment performance, bearing in mind the opportunities and risks in the international capital markets. The sub-fund aims to predominantly invest in higher-risk assets (such as equities and/or commodities) in the medium to long term. In the short to medium term, the proportion of higher-risk investments may amount to 100% but this may be considerably reduced in favor of comparatively lower risk investments (such as bonds with a good rating and/or liquidity). The sub-fund is aimed at investors who prefer a flexible investment policy with a focus on higher-risk assets and are therefore prepared to accept a greater risk of loss. In order to achieve this, the sub-fund invests in exchange traded funds (ETFs), exchange traded commodities (ETCs), equities, bonds, money market instruments and certificates. At least 51% of the sub-fund's net assets are invested in shares of ETFs and ETCs. Up to 100% of the sub-fund's net assets may be invested in higher-risk assets (such as equities and/or commodities). Suitable derivative financial instruments may be used for hedging purposes. The selection of the individual investments is at the discretion of the fund management. The return of the product can be derived from the share price that is calculated daily plus any distribution. The fund distributes annually. This fund is a sub-fund of db PBC for which the sales prospectus and the periodic reports are prepared as a whole. The assets and liabilities of each sub-fund are segregated by law. As a result, assets of one sub-fund are not available in the event of claims against or insolvency of another. The fund's shares may be exchanged for shares in the same or another db PBC SICAV sub-fund. Details can be found in the "Exchange of shares" section of the sales prospectus. The depositary is State Street Bank International GmbH, Luxembourg Branch. More detailed information on this fund, such as the sales prospectus as well as the latest annual and semi-annual report, can be obtained free of charge online at www.dws.com. Select your country of residence on the website, enter the fund name in the search bar and select the desired documents under "Downloads".

Intended retail investor

The sub-fund is aimed at private clients with a medium-term investment horizon and basic knowledge/experience and who can bear a financial loss. The sub-fund can be used for general asset accumulation.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

The following is applicable if you subscribe for or settle shares in a different currency than the fund or share-class currency: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The following risks could be of particular significance for the fund: Risks specific to funds of funds. A more detailed description of risks and other general information can be found in the risk section(s) of the sales prospectus. You may lose some or all of your investment. Your risk is limited to the amount invested. This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:	5 years	
Example Investment:	10.000 EUR	
	If you exit after 1 year	If you exit after 5 years
Scenarios		

Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs Average return each year	5,640 EUR -43.6 %	4,920 EUR -13.2 %
Unfavourable	What you might get back after costs Average return each year	8,630 EUR -13.7 %	10,430 EUR 0.9 %
Moderate	What you might get back after costs Average return each year	10,430 EUR 4.3 %	12,220 EUR 4.1 %
Favourable	What you might get back after costs Average return each year	12,400 EUR 24.0 %	14,120 EUR 7.1 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. For the 1 year holding period the following applies: This type of scenario (Favourable, Moderate, Unfavourable) occurred for an investment between (Favourable: 31.03.2020-31.03.2021, Moderate: 31.05.2019-29.05.2020, Unfavourable: 29.12.2017-28.12.2018). For the recommended holding period the following applies: This type of scenario (Favourable, Moderate, Unfavourable) occurred for an investment between (Favourable: 28.02.2020-28.02.2025, Moderate: 30.11.2016-30.11.2021, Unfavourable: 29.11.2024-31.12.2025).

What happens if DWS Investment S.A. is unable to pay out?

The assets of the fund are kept separately from those of the management company, DWS Investment S.A.. An insolvency or default of the management company should not result in the fund suffering any financial loss in relation to its assets. On the insolvency or default of the depositary State Street Bank International GmbH, Luxembourg Branch securities held by the depositary on behalf of the fund should be protected but the fund may suffer loss in relation to cash and certain other assets which are not protected. Cash deposits of the fund deposited with other credit institutions may cause investors to suffer a financial loss if such deposits are not covered by any existing deposit guarantee schemes. Investment in the fund is not covered by any investor compensation or guarantee scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. 10.000 EUR is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	567 EUR	1,499 EUR
Annual cost impact (*)	5.7 %	2.9 % each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.3% before costs and 3.3% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount. These figures include the maximum distribution fee that the person selling you the product may charge (3.50 % of amount invested/350 EUR). This person will inform you of the actual distribution fee.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	3.50 % of the amount you pay in when entering this investment. This is the maximum that might be taken out of your money before it is invested (entry charge). The entry charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser or distributor.	Up to 350 EUR
Exit costs	We do not charge an exit fee.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.79 % of the value of your investment per year. This is an estimate based on actual costs for the fiscal year ending 31.12.2025.	179 EUR
Transaction costs	0.10 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	10 EUR
Incidental costs taken under specific conditions		
Performance fees	Up to 10% of the absolute appreciation as long as the net asset value per share exceeds the high water mark and also the respective hurdle rate. Such amount shall, however, not exceed 1% of the average net asset value. Details can be found in the special section of the Sales Prospectus. The estimated performance fee for this product is 0.28 %. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	28 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 5 years. The product has no minimum holding period.

This product has no required minimum holding period. The recommended holding period has been selected due to its investment strategy and because it is designed for a medium term investment horizon. It is expected that it will be possible to achieve the investment objective of the fund within this time frame. You may request the redemption of shares generally on each valuation date. No fees or penalties will be charged by the company for any such transaction.

There is no change on the risk return profile when you redeem your shares early.
