Lipper Leaders Rating System - Ratings from 1 (lowest) to 5 (highest)

First digit = Total Return; second digit = Consistent Return; third digit = Preservation; fourth digit = Expense

Important Notice

When the custodian sets the price on the last trading day of the month there can be a difference of up to ten hours between the times at which the fund price and the benchmark are calculated. In the event of strong market movements during this period, this may result in the over- or understatement of the Fund's performance relative to the benchmark at the end of the month (this is referred to as the "pricing effect").

This document is intended as marketing communication. Please read the fund prospectus and KID before making a final investment decision.

DWS is the brand name under which DWS Group GmbH & Co. KGaA and its subsidiaries do business. Clients will be provided DWS products or services by one or more legal entities that will be identified to them in relevant documentation.

This document does not constitute investment advice.

Complete information on the Fund, including all risks and costs, can be found in the relevant current prospectus. Together with the relevant key information document, these constitute the only binding sales documents for the Fund. Investors can obtain these documents, together with regulatory information, as well as the latest constitutional documents for the Fund [in German] from DWS Investment GmbH, Mainzer Landstraße 11-17, 60329 Frankfurt am Main and, in case of Luxembourg domiciled Sub-Funds, from DWS Investment S.A., 2, Boulevard Konrad Adenauer, L-1115 Luxembourg, in printed form free of charge, or for active products available for download from Germany: www.dws.de or from different locations in respective language from <https://funds.dws.com> and for passive products under www.etf.dws.com.

A summary of investor rights is available: Germany (in German) <https://www.dws.de/footer/rechtliche-hinweise/>, Austria (in German) <https://funds.dws.com/de-at/footer/rechtliche-hinweise/>, Belgium (in Dutch) <https://funds.dws.com/be/NLBE/Belangrijke-Informatie>, (in French) <https://funds.dws.com/be/FRBE/Information-Importante>, France (in French) <https://funds.dws.com/fr-fr/footer/ressources-juridiques/>, Luxembourg (in German) <https://www.dws.de/footer/rechtliche-hinweise/>, Spain (in Spanish) <https://funds.dws.com/es-es/header/reclamaciones/>, Netherlands (in Dutch) <https://funds.dws.com/nl-nl/footer/juridische-bronnen/>, Ireland (in English) <https://funds.dws.com/en-ie/footer/legal-resources/>, Sweden (in Swedish) <https://funds.dws.com/se/Important-information> and Italy (in Italian) <https://funds.dws.com/it-it/footer/avvertenze-legali/>.

The Investment Company may decide to terminate the arrangements made for the marketing of this fund.

Forecasts are not a reliable indicator of future performance. Forecasts are based on assumptions, estimates, opinions and hypothetical performance analysis, therefore actual results may vary.

The decision to invest in the advertised fund should not only depend on the sustainability-relevant aspects. All characteristics or objectives of the advertised fund should be taken into account. These can be found in the prospectus and KID.

The gross-performance calculated (BVI method) considers all costs on the Funds/Sub-Funds level (e.g. Management Fee). In addition, the net-performance considers a contingent Upfront Sales Charge.

Past performance is not a reliable indication of future performance.

Tax information can be found in the relevant prospectus

Any opinions stated reflect the current assessment of DWS Investment GmbH and are subject to change without notice.

This document is intended to be a marketing communication, not a financial analysis. Accordingly, it may not comply with legal obligations requiring the impartiality of financial analysis or prohibiting trading prior to the publication of a financial analysis.

According to the information in the sales prospectus distribution of the products mentioned in this document is subject to restrictions of the relevant jurisdictions. This document and the information contained herein may only be distributed and published in jurisdictions in which such distribution and publication is permissible in accordance with applicable law in those jurisdictions. Direct or indirect distribution of this document is prohibited in the USA as well as to or for the account of US persons and persons residing in the USA.

Performance

Performance (in %) - Share Class LC

■ Fund ■ Benchmark*

*Benchmark: CDAX UCITS Capped (Net Return) - 30.4.2024 (RI)

Calculation of performance is based on the time-weighted return and excludes front-end fees. Individual costs such as fees, commissions and other charges have not been included in this presentation and would have an adverse impact on returns if they were included. Past performance is not a reliable indicator of future returns.

(1) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 30/09/2025. They are subject to change from year to year.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Address

E-Mail: info@dws.com

Note

Because of its composition or the techniques used by its managers, the fund is subject to heightened volatility. Consequently, unit prices may fluctuate sharply in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/equity-funds/DWS000001596>

Opportunities

In accordance with the investment policy.

Risks

- The fund invests its assets in selected regions or sectors. This increases the risk that the fund may be negatively influenced by the economic and political conditions in the respective regions or sectors.
- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Equity Funds - Europe

April 2026

As at 30/04/2026

Fund Data

Investment Policy

The fund invests in equities of issuers with a high market capitalization and who have their headquarters in a member state of the European Economic and Monetary Union. Around 40 to 60 stocks are included in the portfolio that Fund management considers to have above-average earnings potential. Depending on the market situation, the management may deviate from the above-mentioned diversification target. The investment universe is among others defined by environmental and social aspects and principles of good corporate governance. The fund is actively managed.

Fund Management's Comment

You can find the Fund management's detailed commentary in DWS Flagship Fund Reporting and on the individual pages of the factsheets.

(1) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 31/12/2025. They are subject to change from year to year.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Note

¹ Based on the gross investment.

Because of its composition or the techniques used by its managers, the fund is subject to heightened volatility. Consequently, unit prices may fluctuate sharply in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/equity-funds/DWS000000304>

Opportunities

In accordance with the investment policy.

Risks

- The fund invests its assets in selected regions or sectors. This increases the risk that the fund may be negatively influenced by the economic and political conditions in the respective regions or sectors.
- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

April 2026

As at 30/04/2026

Fund Data

Investment Policy

The sub-fund's assets are invested in large-cap Eurozone equities selected according to the CROCI methodology and the CROCI Euro Strategy. The Strategy seeks to select the 30 shares with the lowest CROCI Economic Price Earnings Ratios. The sub-fund is periodically reconstituted with the intention that each stock is equally weighted. The fund is actively managed. Effective retroactively from the benchmark adoption date, the benchmark has been adjusted from MSCI EMU Value Price Return index to MSCI EMU Value Net Return index to better reflect reinvested dividends and withholding taxes.

(2) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 31/12/2025. They are subject to change from year to year.

(3) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. The total expenses listed here represent an estimate since the Fund was launched on (XC:05/03/2026). Actual expenses will be calculated and published once the first financial year has ended. The annual report for each financial year will contain the expense details with their precise calculation.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Note

¹ Based on the gross investment.

Because of its composition or the techniques used by its managers, the fund features a high level of volatility. In other words, unit prices may fluctuate significantly in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/equity-funds/DWS000004068>

Opportunities

In accordance with the investment policy.

Risks

- The fund reallocates investments between various asset classes depending on the market. Depending on the market phase and the reallocation of the fund's assets, it is therefore possible that the risk of the fund may vary. The risk/return profile can therefore fluctuate considerably within a short period of time.
- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- Due to its composition/the techniques used by the Fund management, the investment fund has significantly elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Risk-tolerant

The sub-fund is designed for risk-tolerant investors who seek high-return forms of investment and therefore accept large fluctuations in value as well as very high risks. The strong price fluctuations and high creditworthiness risks result in temporary or permanent declines in the value of units. The investor's high income expectations and risk appetite are offset by the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Fund Data

Investment Policy

The traditional DWS equity fund is characterized by a flexible investment policy that is not rigidly oriented to index weightings – stock selection is pure stock picking based on a fundamental approach. The fund management concentrates on blue chips around the globe, taking care to achieve a mix of financially strong and growth-oriented companies that is appropriate to the market situation. The investment universe is among others defined by environmental and social aspects and principles of good corporate governance. The fund is actively managed.

(1) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 30/09/2025. They are subject to change from year to year.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Note

Because of its composition or the techniques used by its managers, the fund is subject to heightened volatility. Consequently, unit prices may fluctuate sharply in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/equity-funds/DWS000001547>

Opportunities

In accordance with the investment policy.

Risks

- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- The fund may also invest in assets that are not denominated in euro. This can result in your investment falling in value if the euro exchange rate against these currencies increases.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Fund Data

Investment Policy

DWS Global Growth is the Fund for growth stocks – shares issued by companies that demonstrate above-average structural growth and, more importantly, that Fund management considers to have above-average growth prospects. The selection of companies is based on rigorous fundamental analysis. Fund management may also act flexibly, depending on its assessment of the market, and add emerging market stocks to the portfolio. The fund is actively managed.

Opportunities

In accordance with the investment policy.

Risks

- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- The fund invests in emerging markets. Investing in assets from the emerging markets generally entails a greater risk (potentially including considerable legal, economic and political risks) than investing in assets from the markets of established countries.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Factsheet: DWS Invest CROCI Global Dividends

Equity Funds - Global

April 2026

As at 30/04/2026

Fund Data

Investment Policy

The sub-fund's assets are invested in largecap global developed market equities selected according to the CROCI methodology and the CROCI Global Dividends Strategy. The Strategy seeks the 50 shares with the lowest CROCI Economic Price Earnings Ratios after removing those that do not meet dividend sustainability screens based on cash returns, financial leverage and volatility. Stocks with a zero or below median dividend yield are excluded. The sub-fund is periodically reconstituted with the intention of equal weighting. Companies in the Financials and Real Estate sectors are not eligible. The fund is actively managed.

Note

¹ Based on the gross investment.

Because of its composition or the techniques used by its managers, the fund features a high level of volatility. In other words, unit prices may fluctuate significantly in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/equity-funds/DWS000004073>

Opportunities

In accordance with the investment policy.

Risks

- The fund reallocates investments between various asset classes depending on the market. Depending on the market phase and the reallocation of the fund's assets, it is therefore possible that the risk of the fund may vary. The risk/return profile can therefore fluctuate considerably within a short period of time.
- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- Due to its composition/the techniques used by the Fund management, the investment fund has significantly elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Risk-tolerant

The sub-fund is designed for risk-tolerant investors who seek high-return forms of investment and therefore accept large fluctuations in value as well as very high risks. The strong price fluctuations and high creditworthiness risks result in temporary or permanent declines in the value of units. The investor's high income expectations and risk appetite are offset by the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Factsheet: DWS Invest CROCI World Value

Equity Funds - Global

April 2026

As at 30/04/2026

Fund Data

Investment Policy

The sub-fund's assets are invested in large-cap developed market global equities selected according to the CROCI methodology and the CROCI World Strategy. The Strategy seeks to select the 100 shares with the lowest CROCI Economic Price Earnings Ratios while targeting region neutrality and capping each economic sector at 25%. The sub-fund is periodically reconstituted with the intention that each stock is equally weighted. The fund is actively managed.

(2) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 31/12/2025. They are subject to change from year to year.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Note

¹ Based on the gross investment.

Because of its composition or the techniques used by its managers, the fund features a high level of volatility. In other words, unit prices may fluctuate significantly in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/equity-funds/DWS000004072>

Opportunities

In accordance with the investment policy.

Risks

- The fund reallocates investments between various asset classes depending on the market. Depending on the market phase and the reallocation of the fund's assets, it is therefore possible that the risk of the fund may vary. The risk/return profile can therefore fluctuate considerably within a short period of time.
- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- Due to its composition/the techniques used by the Fund management, the investment fund has significantly elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Risk-tolerant

The sub-fund is designed for risk-tolerant investors who seek high-return forms of investment and therefore accept large fluctuations in value as well as very high risks. The strong price fluctuations and high creditworthiness risks result in temporary or permanent declines in the value of units. The investor's high income expectations and risk appetite are offset by the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

(1) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 31/12/2025. They are subject to change from year to year.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Note

¹ Based on the gross investment.

Because of its composition or the techniques used by its managers, the fund is subject to heightened volatility. Consequently, unit prices may fluctuate sharply in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/equity-funds/DWS00000390>

Opportunities

In accordance with the investment policy.

Risks

- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- The fund seeks to generate income from dividends, i.e. from expected distributions per equity. If a company distributes a smaller dividend than expected or no dividend at all, this can have a negative impact on the value of equities or derivatives.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Opportunities

In accordance with the investment policy.

Risks

- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- The fund seeks to generate income from dividends, i.e. from expected distributions per equity. If a company distributes a smaller dividend than expected or no dividend at all, this can have a negative impact on the value of equities or derivatives.
- The fund may also invest in assets that are not denominated in euro. This can result in your investment falling in value if the euro exchange rate against these currencies increases.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

(1) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 30/09/2025. They are subject to change from year to year.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Address

E-Mail: info@dws.com

Note

Because of its composition or the techniques used by its managers, the fund is subject to heightened volatility. Consequently, unit prices may fluctuate sharply in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/equity-funds/DWS000001294>

Opportunities

In accordance with the investment policy.

Risks

- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Note

¹ Based on the gross investment.

Because of its composition or the techniques used by its managers, the fund features a high level of volatility. In other words, unit prices may fluctuate significantly in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/equity-funds/DWS000004075>

Opportunities

In accordance with the investment policy.

Risks

- The fund reallocates investments between various asset classes depending on the market. Depending on the market phase and the reallocation of the fund's assets, it is therefore possible that the risk of the fund may vary. The risk/return profile can therefore fluctuate considerably within a short period of time.
- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- Due to its composition/the techniques used by the Fund management, the investment fund has significantly elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Risk-tolerant

The sub-fund is designed for risk-tolerant investors who seek high-return forms of investment and therefore accept large fluctuations in value as well as very high risks. The strong price fluctuations and high creditworthiness risks result in temporary or permanent declines in the value of units. The investor's high income expectations and risk appetite are offset by the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Factsheet: DWS Invest CROCI US Dividends

Equity Funds - USA

April 2026

As at 30/04/2026

Fund Data

Investment Policy

The sub-fund's assets are invested in large-cap US equities selected according to the CROCI methodology and the CROCI US Dividends Strategy. The Strategy seeks to select the 40 shares with the lowest CROCI Economic Price Earnings Ratios after removing those that do not meet dividend sustainability screens based on cash returns, financial leverage and volatility. Stocks with a zero or below median dividend yield are excluded. The sub-fund is periodically reconstituted with the intention that each stock is equally weighted. Companies in the Financials and Real Estate sectors are not eligible. The fund is actively managed.

(2) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 31/12/2025. They are subject to change from year to year.

(3) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. The total expenses listed here represent an estimate since the Fund was launched on (USD XC:05/03/2026, XC:05/03/2026). Actual expenses will be calculated and published once the first financial year has ended. The annual report for each financial year will contain the expense details with their precise calculation.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

E-Mail: info@dws.com

Note

¹ Based on the gross investment.

Because of its composition or the techniques used by its managers, the fund features a high level of volatility. In other words, unit prices may fluctuate significantly in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/equity-funds/DWS000004071>

Opportunities

In accordance with the investment policy.

Risks

- The fund reallocates investments between various asset classes depending on the market. Depending on the market phase and the reallocation of the fund's assets, it is therefore possible that the risk of the fund may vary. The risk/return profile can therefore fluctuate considerably within a short period of time.
- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- Due to its composition/the techniques used by the Fund management, the investment fund has significantly elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Risk-tolerant

The sub-fund is designed for risk-tolerant investors who seek high-return forms of investment and therefore accept large fluctuations in value as well as very high risks. The strong price fluctuations and high creditworthiness risks result in temporary or permanent declines in the value of units. The investor's high income expectations and risk appetite are offset by the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Opportunities

In accordance with the investment policy.

Risks

- The fund uses derivatives on underlyings so as to participate in their increases in value or to bet on their losses in value. The increased opportunities associated with this are accompanied by increased risk of loss. Furthermore, derivative transactions may be used to hedge the fund's assets. The use of derivative transactions for hedging purposes may reduce the fund's upside opportunities.
- The fund invests its assets in selected regions or sectors. This increases the risk that the fund may be negatively influenced by the economic and political conditions in the respective regions or sectors.
- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- The fund invests in emerging markets. Investing in assets from the emerging markets generally entails a greater risk (potentially including considerable legal, economic and political risks) than investing in assets from the markets of established countries.
- The fund invests in the People's Republic of China. Investments in the People's Republic of China are associated with risks resulting from the special legal, political and economic environment. The future political direction of the Chinese government is uncertain, there is the risk of negative performance due to government interventions and restrictions.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Fax: +49 (0) 69 / 910 - 19090
Internet: www.dws.com
E-Mail: info@dws.com

Note

¹ Based on the gross investment.

Because of its composition or the techniques used by its managers, the fund features a high level of volatility. In other words, unit prices may fluctuate significantly in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/equity-funds/DWS000004074>

Opportunities

In accordance with the investment policy.

Risks

- The fund reallocates investments between various asset classes depending on the market. Depending on the market phase and the reallocation of the fund's assets, it is therefore possible that the risk of the fund may vary. The risk/return profile can therefore fluctuate considerably within a short period of time.
- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- Due to its composition/the techniques used by the Fund management, the investment fund has significantly elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Risk-tolerant

The sub-fund is designed for risk-tolerant investors who seek high-return forms of investment and therefore accept large fluctuations in value as well as very high risks. The strong price fluctuations and high creditworthiness risks result in temporary or permanent declines in the value of units. The investor's high income expectations and risk appetite are offset by the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Equity Funds - Asia

April 2026

As at 30/04/2026

Fund Data

Investment Policy

The fund invests primarily in equities of issuers having their registered office or principal business activity in Asia. A company is viewed as having its principal business activity in Asia if the greatest part of its earnings or revenues is generated there. Considered as Asian issuers are companies having their registered office or principal business activity in Hong Kong, India, Indonesia, Korea, Malaysia, the Philippines, Singapore, Taiwan, Thailand and the People's Republic of China. The fund is actively managed.

(1) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 31/12/2025. They are subject to change from year to year.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Note

¹ Based on the gross investment.

Because of its composition or the techniques used by its managers, the fund is subject to heightened volatility. Consequently, unit prices may fluctuate sharply in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/equity-funds/DWS00000305>

Opportunities

In accordance with the investment policy.

Risks

- The fund invests its assets in selected regions or sectors. This increases the risk that the fund may be negatively influenced by the economic and political conditions in the respective regions or sectors.
- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse affect on the value of the bond.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Fund Data

Investment Policy

The Fund invests at least 70% of its assets in stocks of Chinese companies (including Hong Kong) that we feel have strong market positions and solid prospects. The fund is actively managed. Effective retroactively from the benchmark adoption date, the benchmark has been adjusted from a gross return index to MSCI China 10/40 Net Total Return Euro Index to better reflect reinvested dividends and withholding taxes.

(1) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 31/12/2025. They are subject to change from year to year.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Fax: +49 (0) 69 / 910 - 19090
Internet: www.dws.com
E-Mail: info@dws.com

Note

¹ Based on the gross investment.

Because of its composition or the techniques used by its managers, the fund features a high level of volatility. In other words, unit prices may fluctuate significantly in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Opportunities

In accordance with the investment policy.

Risks

- The fund invests in emerging markets. Investing in assets from the emerging markets generally entails a greater risk (potentially including considerable legal, economic and political risks) than investing in assets from the markets of established countries.
- The fund invests in the People's Republic of China. Investments in the People's Republic of China are associated with risks resulting from the special legal, political and economic environment. The future political direction of the Chinese government is uncertain, there is the risk of negative performance due to government interventions and restrictions.
- Due to its composition/the techniques used by the Fund management, the investment fund has significantly elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Risk-tolerant

The sub-fund is designed for risk-tolerant investors who seek high-return forms of investment and therefore accept large fluctuations in value as well as very high risks. The strong price fluctuations and high creditworthiness risks result in temporary or permanent declines in the value of units. The investor's high income expectations and risk appetite are offset by the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Opportunities

In accordance with the investment policy.

Risks

- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- The fund invests in emerging markets. Investing in assets from the emerging markets generally entails a greater risk (potentially including considerable legal, economic and political risks) than investing in assets from the markets of established countries.
- The fund seeks to generate income from dividends, i.e. from expected distributions per equity. If a company distributes a smaller dividend than expected or no dividend at all, this can have a negative impact on the value of equities or derivatives.
- Due to its composition/the techniques used by the Fund management, the investment fund has significantly elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Risk-tolerant

The sub-fund is designed for risk-tolerant investors who seek high-return forms of investment and therefore accept large fluctuations in value as well as very high risks. The strong price fluctuations and high creditworthiness risks result in temporary or permanent declines in the value of units. The investor's high income expectations and risk appetite are offset by the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Fund Data

Investment Policy

Agriculture has developed into a dynamic growth market across the globe, as a growing world population needs to be provided with adequate food while per capita area under cultivation is declining. The Fund management takes advantage of the opportunities of all important sectors of the agricultural industry and invests flexibly along the agricultural value chain – from seed to the supermarket. Specifically, the focus is on the following areas: fertilizer, agricultural equipment, seed and crop protection, agricultural logistics, processing and distribution. The fund is actively managed.

(1) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 31/12/2025. They are subject to change from year to year.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Address

DWS Investment GmbH

E-Mail: info@dws.com

Note

¹ Based on the gross investment.

Because of its composition or the techniques used by its managers, the fund features a high level of volatility. In other words, unit prices may fluctuate significantly in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/equity-funds/DWS000000348>

Opportunities

In accordance with the investment policy.

Risks

- The fund invests its assets in selected regions or sectors. This increases the risk that the fund may be negatively influenced by the economic and political conditions in the respective regions or sectors.
- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- Due to its composition/the techniques used by the Fund management, the investment fund has significantly elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Risk-tolerant

The sub-fund is designed for risk-tolerant investors who seek high-return forms of investment and therefore accept large fluctuations in value as well as very high risks. The strong price fluctuations and high creditworthiness risks result in temporary or permanent declines in the value of units. The investor's high income expectations and risk appetite are offset by the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Bond Funds

EUR

Factsheet: DWS Covered Bond Fund

Bond Funds - EUR

April 2026

As at 30/04/2026

Fund Data

Investment Policy

Fixed income fund with focus on European covered bonds such as German "Pfandbriefe", Spanish "Cedulas" and French "Obligations Foncières". The fund is only investing in euro-denominated securities with an active duration management. Active management of maturities and duration. The fund is actively managed.

Fund Management's Comment

In April, financial markets calmed down somewhat after a further escalation of the conflict in Iran was initially averted. However, the ongoing blockade of the Strait of Hormuz fueled persistent concerns about growth and inflation worldwide. Following the sharp fluctuations at the start of the conflict, government bond yields remained at elevated levels and generally moved sideways. The calming of the markets led to a narrowing of risk premiums across most asset classes.

Covered bonds saw virtually no change in risk premiums relative to German government bonds. The primary market was active again in April. Twenty new issues with a total volume of approximately EUR 15 billion were placed. The ECB currently holds around EUR 197 billion in covered bonds as part of its expiring covered bond purchase program (CBPP3) as of April 24, 2026.

Opportunities

In accordance with the investment policy.

Risks

- The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse affect on the value of the bond.
- The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Income-oriented

The sub-fund is designed for income-oriented investors who wish to achieve capital growth through dividend distributions and interest income from bonds and money market instruments. Expected earnings are offset by equity, interest rate and currency risks as well as creditworthiness risks and the possibility of loss of the invested capital, up to the total amount invested. The investor is willing and able to bear a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Factsheet: DWS ESG Zinseinkommen

Bond Funds - EUR

April 2026

As at 30/04/2026

Fund Data

Investment Policy

The Fund invests primarily in government bonds, corporate bonds and covered bonds. Investments in bonds of agency issuers, subordinated bonds and ABS are also possible. The Fund invests in securities denominated in Euros or hedged against the Euro. Active duration management is an essential part of the strategy. The investment universe is among others defined by environmental and social aspects and principles of good corporate governance. The fund is actively managed.

Fund Management's Comment

As at 31/03/2026: March saw a significant rise in yields. This was triggered by the military confrontation between the US, Israel and Iran, which led to the Strait of Hormuz becoming largely impassable for cargo shipping. As a result, oil and gas prices have risen sharply and inflationary pressures are mounting. This also increases the likelihood that the ECB will raise key interest rates this year. Bond prices came under pressure, with securities having shorter remaining maturities in particular seeing sharp rises in yields. Long-term bond prices also fell. The yield on 10-year German government bonds reached its highest level in about 15 years. Yield spreads between corporate bonds and German government bonds widened, albeit rather moderately overall given the macroeconomic risks. We consider the three to four ECB rate hikes of 25 basis points each, which the market has at times priced in, to be excessive. Accordingly, we recently made tactical purchases of short- to medium-term interest rate futures. The overall strategic allocation, however, was maintained and remains largely unchanged.

Note

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/bond-funds/DWS000004574>

Opportunities

In accordance with the investment policy.

Risks

- The fund invests in financial instruments that are basically sufficiently liquid but which may be illiquid under certain circumstances. This means that regular trade may be temporarily disrupted or impossible.
- The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse affect on the value of the bond.
- The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Income-oriented

The sub-fund is designed for income-oriented investors who wish to achieve capital growth through dividend distributions and interest income from bonds and money market instruments. Expected earnings are offset by equity, interest rate and currency risks as well as creditworthiness risks and the possibility of loss of the invested capital, up to the total amount invested. The investor is willing and able to bear a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

(1) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 31/12/2025. They are subject to change from year to year.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Opportunities

In accordance with the investment policy.

Risks

- The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Income-oriented

The sub-fund is designed for income-oriented investors who wish to achieve capital growth through dividend distributions and interest income from bonds and money market instruments. Expected earnings are offset by equity, interest rate and currency risks as well as creditworthiness risks and the possibility of loss of the invested capital, up to the total amount invested. The investor is willing and able to bear a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Factsheet: DWS Invest Global Bonds

Bond Funds - EUR

April 2026

As at 30/04/2026

Fund Data

Investment Policy

Globally investing fixed-income fund. The Fund invests in government bonds, bonds from near-government issuers and covered bonds. It may also invest in corporate bonds, financials, subordinated bonds and emerging market bonds, among other segments. Active duration and maturity management. The fund is actively managed.

Fund Management's Comment

As at 31/03/2026: The conflict that erupted in the Middle East took center stage in March due to its impact on oil prices and related consequences. Positive signals from leading indicators for economic development and the outlook for 2026 receded almost entirely into the background as market drivers. Unlike in previous similar market shocks, risk-free asset classes such as German and US government bonds were significant losers in the market, particularly for shorter maturities, which led to corresponding price declines. Emerging inflation scenarios based on oil price trends led to implicit shifts in central bank expectations, with expectations of interest rate hikes now prevailing. In contrast, spread-bearing securities remained relatively stable, with manageable spread widening over the month. We see a significant short-term overreaction in the fixed-income market and expect at least a partial reversal over the coming weeks. We have positioned the portfolio accordingly with increased duration and a more cautious allocation to spread-bearing securities.

Note

¹ Based on the gross investment.

Please note that not all share classes and subfunds respectively are registered in every country.

Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/bond-funds/DWS000000543>

Opportunities

In accordance with the investment policy.

Risks

- The fund uses derivatives on underlyings so as to participate in their increases in value or to bet on their losses in value. The increased opportunities associated with this are accompanied by increased risk of loss. Furthermore, derivative transactions may be used to hedge the fund's assets. The use of derivative transactions for hedging purposes may reduce the fund's upside opportunities.
- The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse affect on the value of the bond.
- The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Income-oriented

The sub-fund is designed for income-oriented investors who wish to achieve capital growth through dividend distributions and interest income from bonds and money market instruments. Expected earnings are offset by equity, interest rate and currency risks as well as creditworthiness risks and the possibility of loss of the invested capital, up to the total amount invested. The investor is willing and able to bear a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Fund Data

Investment Policy

The investment objective of the fund is to achieve capital appreciation by investing at least 60% of net assets in interest bearing securities of issuers that have their head office or majority of their activity in the Greater China region. The fund is actively managed and is not managed in reference to a benchmark. The fund's assets are generally hedged to the USD, and invested in interest-bearing securities denominated in USD or hedged to the USD. Renminbi-denominated assets may be invested via the Chinese offshore as well as the Chinese onshore market.

(1) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 31/12/2025. They are subject to change from year to year.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Note

¹ Based on the gross investment.

Because of its composition or the techniques used by its managers, the fund features a high level of volatility. In other words, unit prices may fluctuate significantly in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Opportunities

In accordance with the investment policy.

Risks

- The fund invests in the People's Republic of China. Investments in the People's Republic of China are associated with risks resulting from the special legal, political and economic environment. The future political direction of the Chinese government is uncertain, there is the risk of negative performance due to government interventions and restrictions.
- The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse affect on the value of the bond.
- Due to its composition/the techniques used by the Fund management, the investment fund has significantly elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Risk-tolerant

The sub-fund is designed for risk-tolerant investors who seek high-return forms of investment and therefore accept large fluctuations in value as well as very high risks. The strong price fluctuations and high creditworthiness risks result in temporary or permanent declines in the value of units. The investor's high income expectations and risk appetite are offset by the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Bond Funds

Corporate Bonds

Factsheet: DWS Invest Euro Corporate Bonds

Bond Funds - Corporate Bonds

April 2026

As at 30/04/2026

Fund Data

Investment Policy

The objective of the investment policy is to achieve an outperformance of the Benchmark iBoxx EUR Corporate Index. To this end, the Fund invests primarily in investment grade corporate bonds denominated in Euros or hedged against the Euro. The Fund is actively managed.

Fund Management's Comment

Market conditions stabilised in April after the sharp risk-off move in March. Geopolitical risks around Iran remained in focus, keeping energy prices high and inflation fears alive. Sovereign yields rose to multi-year highs, with the Bund yield briefly above 3.1%, reflecting a more hawkish repricing of rate paths. Despite this challenging rates backdrop, EUR IG credit delivered positive excess returns as spreads tightened materially, supported by the rebound in global equities and improving risk appetite. Primary markets were active but fell short of expectations. EUR IG corporate issuance totalled around €58bn, constrained by Easter holidays and earnings blackout periods. Supply was broadly balanced between financials (€30bn) and non-financials (€28bn), while subordinated and hybrid issuance stood out, making April the busiest month for corporate hybrids since 2020. Secondary spreads tightened significantly to 80bp, with longer dated bonds outperforming, marking a sharp reversal from March. DWS Invest Euro Corporate Bonds gained 1.11% in April, ending the month 0.16% ahead of the benchmark (before fees).

(1) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 31/12/2025. They are subject to change from year to year.

(2) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. The total expenses listed here represent an estimate since the Fund was launched on (LDM:29/01/2025). Actual expenses will be calculated and published once the first financial year has ended. The annual report for each financial year will contain the expense details with their precise calculation.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Note

¹ Based on the gross investment.

Because of its composition or the techniques used by its managers, the fund is subject to heightened volatility. Consequently, unit prices may fluctuate sharply in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/bond-funds/DWS000000371>

Opportunities

In accordance with the investment policy.

Risks

- The fund uses derivatives on underlyings so as to participate in their increases in value or to bet on their losses in value. The increased opportunities associated with this are accompanied by increased risk of loss. Furthermore, derivative transactions may be used to hedge the fund's assets. The use of derivative transactions for hedging purposes may reduce the fund's upside opportunities.
- The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse affect on the value of the bond.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Short-term EUR

Factsheet: DWS Floating Rate Notes

Bond Funds - Short-term EUR

April 2026

As at 30/04/2026

Fund Data

Investment Policy

The fund is actively managed. The investment objective is to achieve conservative fixed income performance in Euros regardless of interest-rate and currency fluctuations. To this end, the Fund invests primarily in floating-rate bonds, short-term bonds, and time deposits. Maturities are actively managed with a focus on the shorter segment.

Fund Management's Comment

The ongoing conflict between Iran, Israel and the US remained the dominant market theme in April. On the one hand, the ceasefire and concurrent diplomatic negotiations led to an improvement in market sentiment due to heightened expectations of a peace agreement in the near future. Meanwhile, the Strait of Hormuz remained blocked by both sides, further fueling inflation fears. Both the US Federal Reserve (Fed) and the European Central Bank kept key interest rates unchanged at their meetings in late April but intend to wait until their next meetings to obtain more detailed data on the effects of the Strait of Hormuz blockade and the resulting potential second-round effects on already rising inflation and economic growth. Ultimately, risk premiums fell significantly again in April, contributing to the fund's strong performance during the month. The portfolio remains broadly diversified, not least through participation in attractive new issues from the financial and corporate sectors.

Money Market

Money Market Fund

Factsheet: DWS Institutional ESG Euro Money Market Fund

Money Market - Money Market Fund

April 2026

As at 30/04/2026

Fund Data

Investment Policy

The DWS Institutional ESG Euro Money Market Fund, designed for corporate clients and institutional investors, invests primarily in fixed and floating rate EUR securities with a short interest duration. The Fund is a standard VNAV money market fund according to the ESMA standards and offers a one day value determination (value date). The investment universe is among others defined by environmental and social aspects and principles of good corporate governance. The fund is actively managed.

Fund Management's Comment

The conflict in the Middle East continued into April. Although there was largely a ceasefire between the parties to the conflict, the Strait of Hormuz remained impassable. This led to a further rise in energy prices in April, which had already risen to elevated levels in March. These actual and expected future price increases have both a direct and an indirect impact on inflation in the Eurozone. This was also confirmed by the European Central Bank (ECB) at its meeting on April 30. It currently sees upside risks for inflation and downside risks for the economy. However, the ECB did not yet have enough information to make a monetary policy change, which is why all instruments remained unchanged. This decision was made unanimously after all possible options, including an interest rate hike, had been discussed. However, with the help of the new staff projections, the data should be sufficient for the ECB's next Governing Council meeting on June 11. The vast majority of market participants expect two to three interest rate hikes of 0.25% each in 2026, with the first one as early as June.

Factsheet: DWS Sachwerte

Balanced Funds - Flexible

April 2026

As at 30/04/2026

Fund Data

Investment Policy

DWS Sachwerte focuses on investments in real assets in order to react flexibly to inflationary trends and the varying intensity of the inflation rate. At least 51% of the Fund's assets have to be invested in real assets which contain the following instruments: equities, real estate, commodities, precious metals and inflation-indexed bonds. All these are investment classes that can be considered material assets. It aims to generate the highest possible returns and an appropriate annual distribution in Euro. The fund is actively managed.

Fund Management's Comment

In stark contrast to the weak performance in March, April was marked by a noticeable recovery in global risk assets. The conflict in the Middle East between Iran and the US remained the overarching influencing factor. The announcement of a ceasefire on April 8 led to gains in stock and government bond prices through the middle of the month. The US Dollar weakened by about 2% month-over-month. The price of oil (Brent) initially fell by more than 20%, but subsequently rebounded by nearly 50% from its lows following the blockade of the Strait of Hormuz. Global equity markets closed the month with significant gains. US and emerging market equities posted gains of around 9% and 13% (in euro), respectively, while European equities recovered by a good 6%. US and Asian markets benefited from a strong earnings season and continued strength in the technology and AI sectors. The global technology sector gained more than 15% (in euro) over the course of the month. Yields on two- and ten-year government bonds in the US, the UK and Germany remained largely stable over the month. Gold lost just over 2% in euro terms.

Note

Because of its composition or the techniques used by its managers, the fund is subject to heightened volatility. Consequently, unit prices may fluctuate sharply in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/balanced-funds/DWS000004810>

Opportunities

In accordance with the investment policy.

Risks

- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse affect on the value of the bond.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Balanced Funds

Convertible Bonds

Factsheet: DWS ESG Convertibles

Balanced Funds - Convertible Bonds

April 2026

As at 30/04/2026

Fund Data

Investment Policy

The Fund offers access to a diversified universe of global convertible bonds. Plain convertible bonds are predominantly used for this purpose. The target investment horizon is 3-5 years. The Fund invests primarily in convertible bonds in the balanced equity-delta range to represent the convex profile of the asset class. Currency risks are systematically hedged. The investment universe is among others defined by environmental and social aspects and principles of good corporate governance. The fund is actively managed.

Fund Management's Comment

April was marked by ongoing geopolitical risks and energy price shocks. Nevertheless, equity markets gained significantly in value and offset the losses from March, although dispersion within sectors remains very high. Once again, the main driver of the positive performance was the AI sector and related companies. The environment for convertible bonds remains constructive, particularly due to the high proportion of companies with ties to AI. Furthermore, the share of emerging markets—in a global context—has grown significantly over the past few quarters—a region we currently favor. Meanwhile, the primary market remains at record levels; over USD 65 billion has been issued to date, supporting the growing asset class with attractive structures and improving diversification. The fund (FC unit class) gained 6.4% in value in April. The equity delta (exposure) remains balanced, and we view the average credit rating as being at the lower end of the investment-grade range.

Opportunities

In accordance with the investment policy.

Risks

- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- The fund invests in convertible and warrant-linked bonds. Convertible and warrant-linked bonds embody the right to convert the bond into equities or to acquire equities. The performance of the value of the convertible and warrant-linked bonds is therefore dependent on the price performance of the equity as the underlying. The risks of the performance of the underlying equities can therefore impact on the performance of the convertible and warrant-linked bonds.
- The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse affect on the value of the bond.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Balanced Funds - Convertible Bonds

April 2026

As at 30/04/2026

Fund Data

Investment Policy

The Fund offers access to a diversified universe of global convertible bonds. Plain convertible bonds are predominantly used for this purpose. The target investment horizon is 3-5 years. The Fund invests primarily in convertible bonds in the balanced equity-delta range to represent the convex profile of the asset class. Currency risks are systematically hedged (except for share classes with a (CE)-abbreviation). The fund is actively managed.

Fund Management's Comment

April was marked by ongoing geopolitical risks and energy price shocks. Nevertheless, equity markets gained significantly in value and offset the losses from March, although dispersion within sectors remains very high. Once again, the main driver of the positive performance was the AI sector and related companies. The environment for convertible bonds remains constructive, particularly due to the high proportion of companies with ties to AI. Furthermore, the share of emerging markets—in a global context—has grown significantly over the past few quarters—a region we currently favor. Meanwhile, the primary market remains at record levels; over USD 65 billion has been issued to date, supporting the growing asset class with attractive structures and improving diversification. The fund (FC unit class) gained 6.6% in value in April. The equity delta (exposure) remains balanced, and we view the average credit rating as being at the lower end of the investment-grade range.

(1) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 31/12/2025. They are subject to change from year to year.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Note

¹ Based on the gross investment.

Because of its composition or the techniques used by its managers, the fund is subject to heightened volatility. Consequently, unit prices may fluctuate sharply in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/balanced-funds/DWS000000323>

Opportunities

In accordance with the investment policy.

Risks

- The fund uses derivatives on underlyings so as to participate in their increases in value or to bet on their losses in value. The increased opportunities associated with this are accompanied by increased risk of loss. Furthermore, derivative transactions may be used to hedge the fund's assets. The use of derivative transactions for hedging purposes may reduce the fund's upside opportunities.
- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- The fund invests in convertible and warrant-linked bonds. Convertible and warrant-linked bonds embody the right to convert the bond into equities or to acquire equities. The performance of the value of the convertible and warrant-linked bonds is therefore dependent on the price performance of the equity as the underlying. The risks of the performance of the underlying equities can therefore impact on the performance of the convertible and warrant-linked bonds.
- The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse affect on the value of the bond.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Balanced Funds - Multi-Asset-funds

April 2026

As at 30/04/2026

Fund Data

Investment Policy

The sub-fund's investment objective is to achieve positive long-term performance in euro. The sub-fund is actively managed and, depending on the capital market assessment of portfolio management, invests worldwide in shares, bonds, certificates, active funds and ETFs (exchange-traded funds), derivatives, money market instruments and cash. The sub-fund typically invests between 35% and 65% in equities, but may temporarily deviate from this due to market conditions. The Fund is actively managed.

Fund Management's Comment

Global capital markets rebounded significantly in April from the previous month's losses, despite the ongoing closure of the Strait of Hormuz. A negotiated ceasefire and a robust earnings season, particularly in the AI segment, led to a noticeable easing of market tensions. At the same time, the ongoing naval blockade kept oil prices high, fueling growing fears of stagflation and leading to higher bond yields. In this environment, the MSCI World Index gained approximately 7.6% (in euro), while the euro appreciated by about 1.5% against the US Dollar. Gold (in euro) fell by around 2.5% compared to the previous month, while the oil price (WTI in euro) rose by about 6.8%. In this market environment, DWS Vermögensmandat-Balance gained around 3.9% over the course of the month. The equity segment made a particularly positive contribution. The bond segment and currency hedges also contributed positively to performance, while gold slightly dampened returns.

(1) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 31/12/2025. They are subject to change from year to year.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Note

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Opportunities

In accordance with the investment policy.

Risks

- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse affect on the value of the bond.
- The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Income-oriented

The sub-fund is designed for income-oriented investors who wish to achieve capital growth through dividend distributions and interest income from bonds and money market instruments. Expected earnings are offset by equity, interest rate and currency risks as well as creditworthiness risks and the possibility of loss of the invested capital, up to the total amount invested. The investor is willing and able to bear a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Balanced Funds - Multi-Asset-funds

April 2026

As at 30/04/2026

Fund Data

Investment Policy

The sub-fund's investment objective is to achieve positive long-term performance in euro. The sub-fund is actively managed and, depending on the capital market assessment of portfolio management, invests worldwide in shares, bonds, certificates, active funds and ETFs (exchange-traded funds), derivatives, money market instruments and cash. The sub-fund typically invests between 65% and 100% in equities, but may temporarily deviate from this due to market conditions. The Fund is actively managed.

Fund Management's Comment

Global capital markets rebounded significantly in April from the previous month's losses, despite the ongoing closure of the Strait of Hormuz. A negotiated ceasefire and a robust earnings season, particularly in the AI segment, led to a noticeable easing of market tensions. At the same time, the ongoing naval blockade kept oil prices high, fueling growing fears of stagflation and leading to higher bond yields. In this environment, the MSCI World Index gained approximately 7.6% (in euro), while the euro appreciated by about 1.5% against the US Dollar. Gold (in euro) fell by around 2.5% compared to the previous month, while the oil price (WTI in euro) rose by about 6.8%. In this market environment, DWS Vermögensmandat-Dynamik gained approximately 6.0% over the course of the month. The equity segment made a particularly positive contribution. The bond segment and currency hedges also contributed positively to performance, while gold slightly dampened returns.

Note

Because of its composition or the techniques used by its managers, the fund is subject to heightened volatility. Consequently, unit prices may fluctuate sharply in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Opportunities

In accordance with the investment policy.

Risks

- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse affect on the value of the bond.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Guarantee Funds

Fund Data

Investment Policy

A dynamic hedging strategy (DWS Flexible Portfolio Insurance or DWS FPI) which is regularly shifted between a growth component (e.g. equity funds, commodity investments) and a capital preservation component (e.g. selected bond and money-market funds), depending on market conditions. In periods in which the market declines for an extended period or in very volatile periods, the Fund may invest up to 100% of its assets in bond/money-market funds or via direct investment in bonds or money-market instruments. Please refer to the prospectus for the exact scope of the guarantee. The fund is actively managed.

Fund Management's Comment

As in the previous month, the conflict between the US and Iran continued to dominate market activity in April and caused uncertainty worldwide. Restrictions in the Strait of Hormuz led to persistently high energy prices and heightened concerns about global trade. The resulting rise in inflation expectations dampened hopes for interest rate cuts, which weighed on bond markets. For example, yields on US and German government bonds continued to rise. In contrast, robust corporate earnings, particularly from the technology and defense sectors, drove significant gains in some equity markets. Below is an overview of selected indices:

- MSCI World Index (USD): 9.4%
- MSCI World Index (EUR): 7.7%
- EURO STOXX 50 Index: 6.2%
- S&P 500 Index (USD): 10.4%
- Nikkei 225 Index (JPY): 16.1%
- Bloomberg Commodity TR Index (EUR): 2.6%

The current yield on German government bonds rose from 3% to 3.1%. The portion of risky investments was around 88% at the end of the month.

Total Return Strategies

April 2026

As at 30/04/2026

Fund Data

Investment Policy

DWS Concept Kaldemorgen* is a multi-asset fund without a benchmark with a moderate risk profile (five-year rolling volatility approx. 4%–8%; no guarantee). The objective is to optimize the yield per risk unit by investing in equities, bonds, currency, gold and other suitable assets. Team-based risk management is an integral part of the investment process. Derivates are used for hedging/investment purposes. The Fund is actively managed. // *Managed based on the strategy developed by Klaus Kaldemorgen, which is described in further detail in the sales prospectus.

Fund Management's Comment

You can find the Fund management's detailed commentary in DWS Flagship Fund Reporting and on the individual pages of the factsheets.

Please note: a separate monthly special report on the Fund is available for financial advisors and institutional clients.

*plus performance-related fee

(2) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 31/12/2025. They are subject to change from year to year.

(3) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. The total expenses listed here represent an estimate since the Fund was launched on (CHF FCH100:30/09/2022, LDM:29/01/2025, ND:26/01/2026, PFD:26/01/2026). Actual expenses will be calculated and published once the first financial year has ended. The annual report for each financial year will contain the expense details with their precise calculation.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Note

¹ Based on the gross investment.

Because of its composition or the techniques used by its managers, the fund is subject to heightened volatility. Consequently, unit prices may fluctuate sharply in either direction within short periods of time.

Please note that not all share classes and subfunds respectively are registered in every country. Units issued by Deutsche Invest SICAV may only be sold or offered for sale in jurisdictions in which such offer or sale is permitted.

Figures subject to audit. The current sales prospectus which is legally binding for the purchase of fund units is available from your financial consultant or DWS Investment GmbH. The sales prospectus contains detailed information about risk. Evaluations made in this report may change at any time without prior announcement. These statements are based on our assessment of the current legal and tax information.

Transparency in accordance with Article 8 of the Disclosure Regulation (EU) No 2019/2088. Link: <https://funds.dws.com/en-lu/total-return-strategies/DWS000000424>

Opportunities

In accordance with the investment policy.

Risks

- The fund uses derivatives on underlyings so as to participate in their increases in value or to bet on their losses in value. The increased opportunities associated with this are accompanied by increased risk of loss. Furthermore, derivative transactions may be used to hedge the fund's assets. The use of derivative transactions for hedging purposes may reduce the fund's upside opportunities.
- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- The fund invests in convertible and warrant-linked bonds. Convertible and warrant-linked bonds embody the right to convert the bond into equities or to acquire equities. The performance of the value of the convertible and warrant-linked bonds is therefore dependent on the price performance of the equity as the underlying. The risks of the performance of the underlying equities can therefore impact on the performance of the convertible and warrant-linked bonds.
- The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse affect on the value of the bond.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the investor profile:

Investor profile: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

Accumulated returns

This refers to an accumulating fund under Luxembourg law. It is taxed upon sale.

All-in-fee

The total daily charges to fund assets arising from the business activities of the fund. It is composed of the management fee, the custodian fee and other costs (e.g., the cost of announcements and auditors' fees; for some funds it includes a pricing fee of up to 0.2%) and is given as a percentage per annum. The performance-based compensation incurred by various funds, the pure securities transaction costs of fund management and the Luxembourg "Taxe d'abonnement" are not included in the total expenses.

Alpha

A measure of the difference between the risk-adjusted return on an investment and a benchmark. The alpha measures the part of the performance that cannot be explained by market movements or market risk, but rather is derived from the selection of securities within the market. Alpha is a way of measuring the active contribution to performance made by the portfolio manager. It is also a good yardstick to use when comparing several funds. The figure is calculated on a 3-yearly basis.

Average dividend yield

Measures the average dividend amount, based on the current share price. This figure is calculated based on the shares (including ADRs/GDRs - > Depository receipts) and REITs contained in a fund.

Average gain in positive months

This is the average percentage return across all calendar months in a specified time period in which the performance of a security / fund was positive.

Average loss in negative months

This is the average percentage loss across all calendar months in a specified time period in which the performance of a security / fund was negative.

Average market capitalization

Measures the average market capitalization of the shares, REITs and ADRs/GDRs (depository receipts) contained in a fund. The market capitalization represents the total market value of a company as determined by multiplying the number of shares issued by the current share price.

Benchmark

A benchmark is a reference or comparison value that is used to measure the success of an investment. The benchmark for funds is usually an index, a combination of indices or an interest rate.

Best Month

Best month defines the calendar month within a specified time period with the highest positive performance.

Beta factor

A measure of sensitivity - given as the average percentage change in the price of a fund when the market (benchmark) rises or falls by 1%. A value over (under) 1 means that on average the fund exhibits more (less) volatility than the benchmark. The figure is calculated on a 3-yearly basis.

Correlation coefficient

Describes the degree to which two values (fund versus benchmark) move in the same direction. The value of the correlation coefficient is between -1 and +1. A correlation of +1 means that the fund generally moves in the same direction as the benchmark, while -1 indicates that the fund generally moves in the opposite direction. A correlation of 0 means that there is no relation between the price movements of the fund and the benchmark. The figure is calculated on a 3-yearly basis.

Coupon

The coupon is the portfolio's average weighted coupon.

Downside Deviation

Downside Deviation corresponds to standard deviation, except that it only takes into account the volatility of negative returns. Downside Deviation differentiates between downside volatility (negative deviation from the mean value or the standard deviation), which is linked to a fall in the price of a security and upside volatility (positive deviation from the mean value or the standard deviation), which is linked to a rise in the price of a security. Downside Deviation only addresses negative volatility. The mean value is the required minimum rate of return specified for a security. The calculation of Downside Deviation considers a minimum rate of return of 0%. The ratio is based on the "main share class" and considers the share class performance since inception. To ensure a comparability all figures are calculated on an annualised basis.

Duration (in years/in months)

A measure of the sensitivity of an investment to changes in interest rates. Duration, which was developed by Frederick Macaulay, is the average period for which invested capital is committed. Because of the interest payable over time on the invested capital, duration is shorter than -> maturity. This version of duration is used in DWS Top Reporting and refers to invested assets (without "Cash and other holdings").

DWS-Risk-Class

The DWS-Risk-Class serves as a point of reference for investors, allowing them to compare their personal risk tolerance with the risks associated with an individual investment fund. Funds in the DWS Group are divided into risk categories 1 (low risk) to 4 (comparatively high

risk). For example, money-market funds generally have a very stable performance and very limited risk and are thus classified as risk class 1. Industry equity funds, in which expectations for above-average returns are associated with a corresponding level of risk, are in risk class 4. Risk classes - examples of fund groups:

1 EUR money-market funds, near-money market EUR funds

2 EUR bond funds, internationally diversified bond funds primarily in hard currencies, short-term bond funds in hard currencies

3 Internationally oriented bond funds with significant unhedged currency positions, equity funds with a focus on Germany, internationally invested equity funds, country equity funds in European hard currencies.

4 Regional and industry funds, emerging-market funds

Early redemption charge

The early redemption charge is a one-time fee paid when fund units are sold. It is usually given as a percentage.

Earnings

During the year, funds generate so-called ordinary income / earnings (e.g., from interest received in the portfolio, dividends, realized capital gains). This income is either regularly reinvested in the fund (accumulated) or distributed at the end of the fiscal year. For the exact amount of the accumulation or distribution of a fund, please visit www.dws.de.

EU interim profit

The amount per fund unit that is subject to the EU interest tax upon sale. This amount is based on the interest accrued since purchase.

Front-end load

The front-end load is a one-time fee paid upon acquisition of fund units. It is usually given as a percentage. Unless otherwise indicated by the fund, the front-end load is based on the net investment amount.

Future long

Futures are forward contracts for a specific commodity. They obligate the buyer of the contract to buy a specific amount and quality of the underlying instrument at a specific time in the future at a price established in the contract. The parties may only relieve themselves of this obligation by selling the contract to a third party. This is called liquidating the position.

Future short

Futures are forward contracts for a specific commodity. They obligate the seller of the contract to deliver a specific amount and quality of the underlying instrument at a specific time in the future at a price established in the contract. The parties may only relieve themselves of this obligation by selling the contract to a third party. This is called liquidating the position.

Information ratio

The information ratio measures the difference between the annualized average return of the fund and that of the benchmark, divided by the --> Tracking error. The higher this value is, the more the investor is compensated for the risk in the fund. The figure is calculated on a 3-yearly basis.

Leverage / level of investment

Effect through which the amount of capital invested is disproportionately affected by actual developments. For example, if the effective interest rate for loans is below the returns available on the capital markets, investors can significantly increase the profitability of their investments by taking out loans and investing them on the capital markets.

Long call

A long call (the purchase of a call option) gives the buyer the contractual right to acquire a specific underlying security under previously established conditions (date, price, etc.). The buyer pays the seller a premium for this right. The buyer can either sell the option to a third party or exercise it himself until the expiration date. The risk is limited to the amount invested by the buyer, the premium.

Longest loss period

The longest loss period is the longest continuous time period during which the average monthly performance of a security / fund has been negative for every calendar month. The risk figure is based on the "main share class" and considers the share class performance since inception.

Long put

A long put (the purchase of a put option) gives the buyer the contractual right to sell a specific underlying security under previously established conditions (date, price, etc.). The buyer pays the seller a premium for this right. He can either sell the option to a third party or exercise it himself up until the expiration date. The risk is limited to the amount invested by the buyer, the premium.

Management fee

The total daily charges to fund assets arising from the business activities of the fund. It is given as a percentage per annum.

Maximum drawdown

The maximum drawdown is the largest percentage drop in value in a given period of time. It measures the amount the fund falls from its highest point to its lowest point in the selected timeframe. The figure is calculated on a 3-yearly basis.

Minimum investment amount

Various funds/asset classes have a minimum investment amount. Please see the Special Part of the Prospectus of the respective fund/asset class for details about that fund/asset class.

Modified duration (in years/in months)

Serves as a measure of interest-rate sensitivity. Modified duration indicates the percentage change in price of a bond (in a portfolio) when the market interest rate changes by 1%. In order to calculate the percentage change in the bond price, the modified duration of the bond is multiplied by the percentage change in the interest rate. This figure helps investors assess the risks and opportunities of a bond at a glance.

Negative Months

Absolute number of calendar months within a specified time period with a negative performance.

Number of shares

Number of shares (including ADRs/GDRs - depositary receipts) and REITs contained in a fund.

Performance-related fee

Amount calculated and charged to fund assets if a performance-related fee is agreed upon in the Special Part of the Prospectus and the fund's performance exceeds that of the benchmark or other reference interest rate (or yield), less costs. It is given as a percentage per annum. For a more detailed definition, please see the Special Part of the prospectus.

Securities lending: performance-related fee from lending profits ("perf.-rel. fee from lending prof.")

Compensation for activities connected with securities lending. In a securities loan, the owner of a security lends securities to a trader under the condition that the loan be repaid within what is usually a very short period of only a few days with securities of a similar type and quality. The lender receives a fee for this. DWS Investments then applies this income (the fee received for the securities loan) to the fund from whose portfolios securities are allowed to be lent and actually were lent, thereby improving the performance of that fund. Up to half of this amount may be retained by DWS Investments. Income from loans is disclosed as a percentage of average fund assets as at the end of the reporting year. In many of its funds, the DWS Group takes advantage of the opportunity to do this and thereby to achieve additional income for the fund.

Positive Months

Absolute number of calendar months within a specified time period with a positive performance.

Sharpe ratio

A measure of risk developed by William F. Sharpe, defined as the excess return on an investment over that of a risk-free investment in relation to the risk of the investment. The higher the Sharpe ratio, the higher the return the investor receives for the risk the investment carries (expressed in volatility). The Sharpe ratio can be used to compare multiple funds. The figure is calculated on a 3-yearly basis.

Short call

A short call (the sale of a call option) obligates the seller (also called the writer) to deliver the underlying instrument at any time until the exercise period of the option expires (expiration date). The seller receives a premium from the buyer for this right, which is usually above the return on comparable investments on the capital market. If a call option is not exercised, it expires and has no value.

Short put

A short put (the sale of a put option) obligates the seller (also called the writer) to buy the underlying instrument at any time until the exercise period of the option expires (expiration date). The buyer receives a premium from the buyer for this right, which is usually above the return on comparable assets on the capital market. If a put option is not exercised, it expires and has no value.

Sortino Ratio

The Sortino Ratio - developed by Frank A. Sortino - only uses the volatility of negative returns (downside deviation). Unlike the Sharpe Ratio, this ratio enables risk-adjusted performance indicators to be calculated that exclude upside price volatility. The ratio is based on the "main share class" and considers the share class performance since inception. To ensure a comparability all figures are calculated on an annualised basis.

Total expense ratio

The total expense ratio is the ratio, given as a percentage, of all the costs associated with the management of a fund to the average net asset value of the fund for the previous fiscal year. This figure is calculated by dividing total fund costs by fund assets. This yields the amount of the total costs as a percentage of fund assets. The timeframe used is the fiscal year.

Tracking error

The tracking error is the standard deviation of the yield differential between a fund and its benchmark. This makes it a measure of how well the fund manager tracks the benchmark. The figure is calculated on a 3-yearly basis.

VaR (Value at Risk)

A measure of risk that indicates the maximum fund losses with a given probability for a given period of time (holding period). VaR is calculated on the basis of the daily prices of the individual securities contained in the portfolio for a year.

Yield

The yield is the annual return on a capital investment, measured as the actual interest earned (effective yield) on the capital invested. It is based on the fund's income (e.g., interest, dividends, realized capital gains) and change in the price of the assets held in the fund. The yield of a fund is derived from the invested assets (without "Cash and other holdings") and is presented as a "gross" figure, i.e., before the deduction of total expenses/fee.

Volatility

Volatility expresses the degree to which the yield on an investment (the price performance of a fund, for example) varies from a mean value in a specific period of time. This makes it a measure of fund risk. The greater the variation from the mean, the higher the volatility. Knowing the volatility allows investors to assess how uncertain the return potential of an investment is. The figure is calculated on a 3-yearly basis.

Weighted Average Life

The weighted average life of the times of the principal repayments of a liability, i.e. a bond. Refers to invested fund assets (without "Cash and other holdings").

Worst Month

Worst month defines the calendar month within a specified time period with the most pronounced negative performance.

CHF - share classes

Share class CHF FCH

There is no sales charge on units in class CHF FCH. Income is accumulated. The sub-fund currency is hedged automatically. The minimum initial investment is CHF 2,000,000.

Share class CHF FCH (P)

There is no sales charge on units in class CHF FCH (P). Income is accumulated. The portfolio currency is hedged automatically. The minimum initial investment is CHF 2,000,000.

Share class CHF LCH

There is a sales charge on units in class CHF LCH. Income is accumulated. The sub-fund currency is hedged automatically.

Share class CHF LCH (P)

There is a sales charge on units in class CHF LCH (P). Income is accumulated. The portfolio currency is hedged automatically.

CNY - share classes

Share class RMB FC

There is no sales charge on units in class RMB FC. Income is accumulated. The minimum initial investment is CNY 2,000,000.

Share class RMB LC

There is a sales charge on units in class RMB LC. Income is accumulated.

EUR - share classes

Share class BC

Units of class BC are currently subject to a contingent deferred sales charge ("CDSC"). The amount of this charge depends on the length of time the units are held. Share classes with the suffix "B" are only offered by authorized distributors.

Share class FC

There is no sales charge on units in class FC. Income is accumulated. The minimum initial investment is EUR 2,000,000.

Share class FC (CE)

There is no sales charge on units in class FC (CE). Income is accumulated. The minimum initial investment is EUR 2,000,000. In addition, the share class with the suffix "CE" for currency exposure aims to build up an additional position in the currencies in which the assets of the sub-fund's portfolio are denominated.

Share class FCH

There is no sales charge on units in class FCH. Income is accumulated. The sub-fund currency is hedged automatically. The minimum initial investment is EUR 2,000,000.

Share class FD

There is no sales charge on units in class FD. Income is distributed. The minimum initial investment is EUR 2,000,000.

Share class IC

There is no sales charge on units in class IC. Income is accumulated. Share class IC is intended exclusively for institutional investors. The minimum initial investment is EUR 10,000,000.

Share class ID

There is no sales charge on units in class ID. Income is distributed. Share class ID is intended exclusively for institutional investors. The minimum initial investment is EUR 10,000,000.

Share class IDH

There is no sales charge on units in class IDH. Income is distributed. The sub-fund currency is hedged automatically. Share class IDH is intended exclusively for institutional investors. The minimum initial investment is EUR 10,000,000.

Share class LC

There is a sales charge on units in class LC. Income is accumulated.

Share class LC (BRIC)

There is a sales charge on units in class LC. Income is accumulated. In addition, the share class with the suffix "BRIC" for the currencies of Brazil, Russia, India and China aims to build up an additional currency position against a currency basket.

Share class LC (CC)

There is a sales charge on units in class LC. Income is accumulated. In addition, the share class with the suffix "CC" for commodity countries aims to build up an additional currency position against this currency basket.

Share class LCH

There is a sales charge on units in class LCH. Income is accumulated. The sub-fund currency is hedged automatically.

Share class LCH (P)

There is a sales charge on units in class LCH (P). Income is accumulated. The portfolio currency is hedged automatically.

Share class LD

There is a sales charge on units in class LD. Income is distributed.

Share class LDH

There is a sales charge on units in class LDH. Income is distributed. The sub-fund currency is hedged automatically.

Share class LDQ

There is a sales charge on units in class LDQ. Income is distributed quarterly.

Share class LS

There is a sales charge on units in class LS. Income is accumulated. No performance-related fee is charged.

Share class NC

There is a lower sales charge on units in class NC, but in comparison with classes LC and LD, the management fee is somewhat higher. Income is accumulated. This share class is not publicly distributed in Germany.

Share class NCH

There is a lower sales charge on units in class NCH, but in comparison with classes LCH and LDH, the management fee is somewhat higher. Income is accumulated. The sub-fund currency is hedged automatically. This share class is not publicly distributed in Germany.

Share class NCH (P)

There is a lower sales charge on units in class NCH (P), but in comparison with classes LCH (P) and LDH, the management fee is somewhat higher. Income is accumulated. The portfolio currency is hedged automatically. This share class is not publicly distributed in Germany.

Share class ND

There is a lower sales charge on units in class ND, but in comparison with classes LC and LD, the management fee is somewhat higher. Income is distributed. This share class is not publicly distributed in Germany.

Share class NDH

There is a lower sales charge on units in class NDH, but in comparison with classes LCH and LDH, the management fee is somewhat higher. Income is distributed. The sub-fund currency is hedged automatically. This share class is not publicly distributed in Germany.

Share class NDQ

There is a lower sales charge on units in class NDQ, but in comparison with class LDQ, the management fee is somewhat higher. Income is distributed quarterly. This share class is not publicly distributed in Germany.

GBP - share classes

Share class GBP FC

There is no sales charge on units in class GBP FC. Income is accumulated. The minimum initial investment is GBP 2,000,000.

Share class GBP FD DS

There is no sales charge on units in class GBP FD DS. Income is distributed. In addition, this share class will seek to gain UK distributor status annually. This share class is intended exclusively for institutional investors. The minimum initial investment is GBP 2,000,000.

Share class GBP LD DS

There is a sales charge on units in class GBP LD DS. Income is distributed. In addition, this share class will seek to gain UK distributor status annually. The units of this share class are thus intended primarily for UK investors.

Share class GBP RD

There is no sales charge on units in class GBP RD. Income is distributed. In addition, this share class will seek to gain UK distributor status annually.

SGD - share classes

Share class SGD LC

There is a sales charge on units in class SGD LC. Income is accumulated.

Share class SGD LCH (P)

There is a sales charge on units in class SGD LCH (P). Income is accumulated. The portfolio currency is hedged automatically.

Share class SGD LDQ

There is a sales charge on units in class SGD LDQ. Income is distributed quarterly.

USD - share classes

Share class USD FC

There is no sales charge on units in class USD FC. Income is accumulated. The minimum initial investment is USD 2,000,000.

Share class USD FCH

There is no sales charge on units in class USD FCH. Income is accumulated. The sub-fund currency is hedged automatically. The minimum initial investment is USD 2,000,000.

Share class USD FDQ

There is no sales charge on units in class USD FDQ. Income is distributed quarterly. The minimum initial investment is USD 2,000,000.

Share class USD LC

There is a sales charge on units in class USD LC. Income is accumulated.

Share class USD LCH

There is a sales charge on units in class USD LCH. Income is accumulated. The sub-fund currency is hedged automatically.

Share class USD LCH (P)

There is a sales charge on units in class USD LCH (P). Income is accumulated. The portfolio currency is hedged automatically.

Share class USD LD

There is a sales charge on units in class USD LD. Income is distributed.

Share class USD LDH

There is a sales charge on units in class USD LDH. Income is distributed. The sub-fund currency is hedged automatically.

Share class USD LDH (P)

There is a sales charge on units in class USD LDH (P). Income is distributed quarterly. The portfolio currency is hedged automatically.
