What is this product?

Type

The product is a UCITS - Part 1 sub-fund of a SICAV under Luxembourg law.

Term

This product is an open-ended fund without predefined maturity. You may request the redemption of shares generally on each valuation date. The company may, however, suspend the redemption if extraordinary circumstances appear to make this necessary, taking into account the interests of the investors. Further, the company may restrict the redemption. The product may be redeemed early in certain circumstances as set out in the sales prospectus. The FC share class of DWS Concept Kaldemorgen was launched in 2011.

Objectives

The fund is actively managed. The fund is not managed in reference to a benchmark. The fund promotes environmental and social characteristics and is subject to the disclosure requirements of a financial product in accordance with article 8(1) of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector. More ESG information is available in the sales prospectus and on the DWS website. The name of the Sub-Fund is derived from the investment strategy developed in 2011 by Klaus Kaldemorgen, the initial portfolio manager of the Sub-Fund and his team (the "Kaldemorgen Strategy"). The Kaldemorgen Strategy represents a flexible, benchmark-independent investment strategy that aims to achieve a positive development of the total return over an economic cycle, taking into account a risk management framework developed exclusively for this strategy. DWS Concept Kaldemorgen offers investors access to this strategy within the framework of a broadly diversified, risk-controlled multi-asset portfolio. The objective of the investment policy is to achieve capital growth. In order to achieve this, the fund invests up to 100% of its assets in equities, bonds, certificates, money market instruments and cash. In addition the fund may invest in derivatives for hedging and investment purposes, among others in order to hedge market risks. The fund will invest in different markets and instruments depending on the overall economic cycle and assessment of the fund management. Up to 20% may be invested into asset backed securities. When selecting investments, environmental and social aspects and the principles of good corporate governance (ESG aspects) are taken into consideration alongside the financial performance. The selection of individual investments is at the discretion of the fund management. The return of the product is reflected by the daily calculated net asset value per unit and the distribution amount if applicable. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. This fund is a sub-fund of DWS Concept for which the sales prospectus and the periodic reports are prepared as a whole. The assets and liabilities of each sub-fund are segregated by law. As a result, assets of one sub-fund are not available in the event of claims against or insolvency of another. More share classes may be available for this fund - please refer to the relevant section of the sales prospectus for further details. Shares may in many cases be exchanged for shares of another share class in the same or another DWS Concept SICAV sub-fund. Details can be found in the "Exchange of shares" section of the sales prospectus. The depositary is State Street Bank International GmbH, Luxembourg Branch. More detailed information on this fund, such as the sales prospectus as well as the latest annual and semi-annual report, can be obtained free of charge online at www.dws.com. Select your country of residence on the website, enter the fund name in the search bar and select the desired documents under "Downloads".

Intended retail investor

The sub-fund is intended for medium term retail investors with basic knowledge/experience, who can bear losses. The sub-fund can be used for general capital accumulation.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

The following is applicable if you subscribe for or settle shares in a different currency than the fund or share-class currency: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The following risks could be of particular significance for the fund: Credit risk, Derivatives risk. A more detailed description of risks and other general information can be found in the risk section(s) of the sales prospectus. You may lose some or all of your investment. Your risk is limited to the amount invested. This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:
Example Investment:

4 years
10.000 EUR

		If you exit after 1 year	If you exit after 4 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs Average return each year	7,220 EUR -27.8 %	7,610 EUR -6.6 %
Unfavourable	What you might get back after costs Average return each year	9,560 EUR -4.4 %	10,570 EUR 1.4 %

Favourable	What you might get back after costs Average return each year	11,500 EUR 15.0 %	12,660 EUR 6.1 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. For the 1 year holding period the following applies: This type of scenario (Favourable, Moderate, Unfavourable) occurred for an investment between (Favourable: 31.03.2020-31.03.2021, Moderate: 31.03.2021-31.03.2022, Unfavourable: 31.10.2019-30.10.2020). For the recommended holding period the following applies: This type of scenario (Favourable, Moderate, Unfavourable) occurred for an investment between (Favourable: 31.03.2020-28.03.2024, Moderate: 28.02.2020-29.02.2024, Unfavourable: 29.11.2024-31.12.2025).

What happens if DWS Investment S.A. is unable to pay out?

The assets of the fund are kept separately from those of the management company, DWS Investment S.A.. An insolvency or default of the management company should not result in the fund suffering any financial loss in relation to its assets. On the insolvency or default of the depositary State Street Bank International GmbH, Luxembourg Branch securities held by the depositary on behalf of the fund should be protected but the fund may suffer loss in relation to cash and certain other assets which are not protected. Cash deposits of the fund deposited with other credit institutions may cause investors to suffer a financial loss if such deposits are not covered by any existing deposit guarantee schemes. Investment in the fund is not covered by any investor compensation or guarantee scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. 10.000 EUR is invested.

	If you exit after 1 year	If you exit after 4 years
Total costs	156 EUR	669 EUR
Annual cost impact (*)	1.6 %	1.6 % each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.3% before costs and 3.8% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
