represent a completely risk-free investment. The fund is classified in category 1 because its share price generally hardly fluctuates at all and the likelihood of both losses and gains should therefore be relatively low. The following risks could be of particular significance for the fund: The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse effect on the value of the bond. A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
